Seek and obtain appropriate, verified, and prioritized data from secondary sources (e.g., family, records, pharmacy)  
PC-A2

Recognize disease presentations that deviate from common patterns and that require complex decision making  
PC-C4

Recognize when to seek additional guidance  
PC-F2

Demonstrate sufficient knowledge to evaluate complex or rare medical conditions and multiple coexistent conditions  
MK-A7

Perform or review audit of a panel of patients using standardized, disease-specific, and evidence-based criteria  
PBLI-A2

Reflect on audit compared with local or national benchmarks and explore possible explanations for deficiencies, including doctor-related, system-related, and patient related factors  
PBLI-A3

Identify areas in resident’s own practice and local system that can be changed to improve the processes and outcomes of care  
PLBI-A4

Engage in a quality improvement intervention  
PLBI-A5

Communicate risks and benefits to alternative to patients  
PLBI-E3

Maintain awareness of the situation in the moment, and respond to meet situational needs  
PLBI-G1

Effectively communicate with other caregivers in order to maintain appropriate continuity during transitions of care  
ICS-C1

Effectively communicate plan of care to all members of the health care team  
ICS-D2

Accept personal errors and honestly acknowledge them  
P-A3

Manage and coordinate care and care transitions across multiple delivery systems, including ambulatory, sub-acute, acute, rehabilitation and skilled nursing  
SBP-A2

Work effectively as a member within the interprofessional team to ensure safe patient care  
SBP-B2

EPA #12
Recognize health system forces that increase the risk for error including barriers to optimal care
SBP-C1

Identify, reflect on, and learn from critical incidents such as near misses and preventable medical errors
SBP-C2

Dialogue with care team members to identify risk for and prevention of medical error
SBP-C3

Understand the mechanisms for analysis and correction of systems errors
SBP-C4

Minimize unnecessary care including tests, procedures, therapies, and ambulatory or hospital encounters
SBP-E2

Demonstrate the incorporation of cost-awareness principles into standard clinical judgments and decision making
SBP-E3

Demonstrate the incorporation of cost-awareness principles into complex clinical scenarios
SBP-E4
