

AAIM Subspecialty Summit: Overview of the Day

- **Welcome and Introductions**
- **Keynote:** Raymond C. Harris, MD; Chief of Division of Nephrology and Hypertension, Vanderbilt University
- **Small Group Discussions**
- **Small Group Presentations and Dialogue**
 - Moderator: Mark Geraci, MD, ASP Past President
- **Recommendations and Galvanize Next Steps**
 - D. Craig Brater, MD, AAIM President
- **Presentation to Introduce Concept and Issues Surrounding Uniform Start Dates**
 - Elaine Muchmore, MD, Chair, AAIM Resident to Fellow Interface Committee
- **Discussion and Q&A**
 - Moderator: Joshua D. Safer, MD, ASP President

AAIM Subspecialty Summit: Small Group Topics

- **Group 1 Topic: Match shenanigans: current issues in the Match (problems and potential solutions)**
 - Nancy Day Adams, MD: Association of Specialty Professors/ American Society of Nephrology
 - Aidan A. Long, MD: Association of Specialty Professors/American Academy of Allergy, Asthma and Immunology
- **Group 2 Topic: All-In (full): What will it take? What does it look like? What will be the requirements?**
 - Steven R. Barczy, MD: Association of Specialty Professors/ American Geriatrics Society
- **Group 3 Topic: Consensus: Is consensus necessary and required? Do we need to be unified?**
 - Mark W. Geraci, MD: Association of Specialty Professors

AAIM Subspecialty Summit: Small Group Topics

- **Group 4 Topic: Status Quo: Is the status quo sufficient? Is it working fine the way it is?**
 - Joshua D. Safer, MD: Association of Specialty Professors
- **Group 5 Topic: Policing: How will the Match be policed? And by whom? What is the monitoring and enforcement procedure?**
 - John P. Flaherty, MD: Association of Specialty Professors/ Infectious Diseases Society of America
- **Group 6 Topic: Special issues and special considerations: How are exceptional situations addressed should we go All-In? i.e., special fellowships, off-cycle**
 - Abraham Thomas, MD: Association of Specialty Professors

AAIM Subspecialty Summit: Expectations

- **Overall, there are no preconceived outcomes for the discussion forums. These small groups are designed to:**
 - Discuss and share the experiences of others,
 - Understand from others,
 - Learn from others.
- **In Summary, we would hope to try to answer a few simple questions through the process:**
 - Are there commonalities among subspecialty stakeholders?
 - What are the 3 key themes that emerge from each small group and why are these themes important?
 - Is there an interest / need to work further on the topic?
 - What does that “work” look like?

Thank You!
