

Script Concordance Self-Assessment Prior to Activity

① If you receive the following qualitative feedback,		② Then, how would you characterize its quality and utility?			
		Poorly written but likely to change practice	Poorly written and unlikely to change practice	Well written but unlikely to change practice	Well written and likely to change practice
1	Dr. X has a vast fund of knowledge. She should continue to read.				
2	I am concerned that Dr. X does not show evidence of ownership of patients				
3	Patients complain that they can't understand them when Dr. X talks to them				
4	Dr. X shakes when she injects joints. I recommend that he visit the simulation center at the library to practice joint technique on a dummy				
5	Documentation needs to be more thorough				
6	Dr. X does not follow up lab results with patients in a timely manner				
7	I am afraid that Dr. X will burn herself out. He's doing way too many things at once.				
8	Dr. X shows up late to clinic. This makes many patients very upset.				
9	Dr. X doesn't lift the shirt when he auscultates the lungs. I'd recommend taking that small step because it then allows inspection for rashes, asymmetry, and other diagnostic clues.				
10	Dr. X is unfamiliar with landmarks on hand and wrist x-rays. I was surprised that he couldn't find the scaphoid bone
