

## Script Concordance Self-Assessment Prior to the Activity

① If you receive the following qualitative feedback,		② Then, how would you characterize its specificity and utility?			
		Not specific and likely to change practice	Not specific and unlikely to change practice	Specific and unlikely to change practice	Specific and likely to change practice
1	Dr. X has a vast fund of knowledge. She should continue to read.		12		
2	I am concerned that Dr. X does not show evidence of ownership of patients			12	
3	Patients complain that they can't understand them when Dr. X talks to them			12	
4	Dr. X shakes when she injects joints. I recommend that he visit the simulation center at the library to practice joint technique on a dummy			11	1
5	Documentation needs to be more thorough		12		
6	Dr. X does not follow up lab results with patients in a timely manner			12	
7	I am afraid that Dr. X will burn herself out. He's doing way too many things at once.		12		
8	Dr. X shows up late to clinic. This makes many patients very upset.				12
9	Dr. X doesn't lift the shirt when he auscultates the lungs. I'd recommend taking that small step because it then allows inspection for rashes, asymmetry, and other diagnostic clues.				12
10	Dr. X is unfamiliar with landmarks on hand and wrist x-rays. I was surprised that he couldn't find the scaphoid bone	11	1		

## Script Concordance Self-Assessment After the Activity

① If you receive the following qualitative feedback,		② Then, how would you characterize its specificity and utility?			
		Not specific but likely to change practice	Not specific and unlikely to change practice	Specific but unlikely to change practice	Specific and likely to change practice
1	It's always a pleasure to work with Dr. X!		12		
2	Presentations are often brief and sometimes confusing. There need to be more details.			9	3
3	Overestimates her sense of knowledge. Doesn't know what she doesn't know		12		
4	Doesn't seem interested in knowing how medicine is financed.		10	2	
5	Draws up plans based on patient preferences. Would recommend he keep doing that.		12		
6	Forgot to get informed consent before joint aspiration!			3	9
7	I suspect he is a superficial learner ... he needs to read more		10	2	
8	Dr. XX is not really reliable. I've asked him to do several things and he just didn't do it.			12	
9	Runs the team well. She should consider delegating more tasks to students and residents on service.				12
10	I've been impressed by how she incorporates feedback into practice. She's gotten a lot better compared to six months ago.				12
