President's Message

Hello DeVry-Keller Community,

I hope that everyone is keeping safe and well during this time as we continue to operate virtually.

I am humbled to have been nominated to serve as the President of this trailblazing club for a second term and would like to thank our board, committee, and student members for their continued support, inspiration, and dedication.

This past year has altered our educational and professional practices, so we look forward to bringing you valuable and insightful events focused on career development from our “Paving Your Career Path with the CMA” event to our “Interview Preparation Bootcamp for a Virtual Climate”.

I would also like to say a special congratulations to everyone who is graduating this July 2021. I wish you all the best in your future endeavors.

Sincerely,

Sophie Evans. DeVry-Keller Student Accounting Club, President

About IMA

“IMA® (Institute of Management Accountants) is the worldwide association of accountants and financial professionals in business. Founded in 1919, we are one of the largest and most respected associations focused exclusively on advancing the management accounting profession. We are committed to empowering our 125,000+ members—and those throughout the rest of the profession—to strengthen on-the-job skills, better manage companies, and accelerate careers. We invite our members to discover the myriad possibilities within the profession and build an actionable future in management accounting” (IMA, 2020).

imanet.org

IMA Membership Benefits

“Participate in IMA’s scholarship, award, and competition programs”

Network with 125,000+ like-minded IMA members from around the globe

Enhance your knowledge through IMA's large portfolio of continuing education courses (many are free to members)

Gain leadership skills by becoming a part of the board of directors of your school chapter

Prepare and sit for the Certified Management Accountant (CMA) exam.

About the IMA Long Island Chapter (Our sponsor chapter)

"The Long Island Chapter is a great resource for all Accounting and Finance professionals. We provide quality, informative, in-person educational programs by professional speakers to assist in meeting your education requirements and to keep you up to date on the latest management accountant topics." (Long Island Chapter, 2020).

Past Chapter Events

Applying Data Analytic Best Practice to Detect White Collar Crime Series- Part I

On April 21, we held Part I of our co-created "Applying Data Analytic Best Practice to Detect White Collar Crime Series" with guest speakers **Jian Xiao**, MBA, CPA, CGMA, CMA, Founder of Turning Point Solutions; and **Lawrence Vigna**, CFE, Supervisory Forensic Accountant FBI Phoenix Division. The guest speakers shared expert insights into the history of data processing and discussed data analytic frameworks and models.

History of Data Processing

- **Late 1800's:** Herman Hollerith invented the Hollerith desk to process and analyze data collected from the US Census through punch cards to maximize work efficiency.
- **Late 2000's Big data:** saw an increase in large volumes of varied structured and unstructured sourced data received at a high velocity due to technological advances in data capturing. Organizations needed to implement data processing frameworks to process and analyze the variability and veracity of the data in a timely manner in order for it to be helpful with strategic decision makings.

The Role of the Accountant

- Colonial America: many transactions were done through bartering thus the role of the accountant was rudimentary.
- As the number of corporations rose in America, stakeholders required more expansive financial information and the responsibilities of the accountant developed from elementary bookkeeping to intrinsic accounting.
- With the increase of data, advancements in technology, and changes in rules and regulations, the accountant is now responsible for a variety of services from tax, auditing, financial, and consulting services, to strategic, performance, and risk management services.

Data Analytics Frameworks- GOLD

Generate relevant data

Organize data into logical layers

Leverage analytics to identify hidden patterns

Develop & Deploy data driven strategy to execute the firm's mission

Leverage analytics to identify hidden patterns

Descriptive: What we know

The collection and presentation of historical data: Statistics, Financial Statements, Histograms, Charts...

Diagnostic: Why did it happen?

Data discovering, Drill-Down, Data Mining, Correlations, Variances, (fuzzy lookup, pivot tables)

Predictive: What Could Happen?

Determine outcome probabilities: Classification, Clustering, Forecast, Outliers, Time Series...

Prescriptive: What should happen?

What-if scenarios, Sensitivity analytics, Machine Learning, Artificial Intelligence (AI)...

Applying Data Analytic Best Practice to Detect White Collar Crime Series- Part II

On May 12, the IMA Queens College Student Chapter held Part II of our co-created "Applying Data Analytic Best Practice to Detect White Collar Crime Series" with guest speakers **Jian Xiao**, MBA, CPA, CGMA, CMA, Founder of Turning Point Solutions; **Lawrence Vigna**, CFE, Supervisory Forensic Accountant FBI Phoenix Division; and **Suzanne Allen**, CPA, Special Agent FBI Phoenix Division.

Big Data: The Four “V’s”

Volume: the size (amount) of data sets that need to be securely collected, processed, and stored. Data is now often collected in terabytes and petabytes due to the influx of information.

Velocity: the frequency (speed) that new data is produced.

Variety: the diversity in data collected. Data can be structured (traditional, well defined data such as dates and currency), unstructured (undefined data that lacks data frames, constraints, etc., like audio files, videos, and images) or semi-structured.

Veracity: the integrity, accuracy, and quality of the data. High veracity data improves the usefulness of it.

Preparing for your FBI Career: Differences between FBI Special Agent vs. FBI Forensic Accountant

	Special Agent	Forensic Accountant
Gun (armed)	Yes	No
Can arrest	Yes	No
Fit for duty (fitness)	Yes	No
Quantico training	18 weeks	5 weeks
Hired for particular office	No	Yes
Can transfer	Yes	Yes
Pay scale	GS-10 to GS-13 plus 25% availability pay	GS-9 to GS-13 plus comp time or overtime

Preparing for your FBI Career: FBI Forensic Accountant Qualifications

Education: Bachelor's and/or Master's degree in accounting or Bachelor's degree with 24 Accounting semester hours

Specialized Work Experience (3+ years): Forensic Accounting, Public Accounting, Litigation Support/Dispute Services, Government Accounting/Auditing, Financial Services Industry, Corporate Accounting/Internal Auditing

Certifications Preferred: Certified Public Accountant (CPA), Certified Fraud Examiner (CFE), Certified Financial Forensics (CFF), and Certified Internal Auditor (CIA)

Upcoming Chapter Event

Paving Your Career Path with the CMA!

Date: Wednesday, September 15, 2021

Login Time: 4:45 p.m. to 5:00 p.m. (EST)

Event Time: 5:00 p.m. to 6:00 p.m. (EST)

REGISTER HERE!

In this event you will discover the benefits of being an IMA student member, learn about the advantages of upskilling with the CMA (Certified Management Accountant) certification, gain an insight into the steps towards becoming a CMA, discover an array of CMA career paths, and hear testimonials from CMA industry professionals.

Mary Patterson

IMA Academic Outreach Manager

mary.patterson@imanet.org

Mary Patterson is the Business Development Manager for IMA (Institute of Management Accountants) with a focus on academic outreach. Mary has over 10 years of experience working with faculty and students in accounting and finance to help students prepare for licenses and certifications related to the accounting industry. Mary's primary responsibility is to help guide students with career plans after graduation, assist with the CMA certification, student scholarships, and memberships to IMA.

Bernice F. Jenkins, CMA, CPA

IMA Volunteer Leadership Standing Board Committee

Bernice F. Jenkins has spent the last 10 years in multiple roles as a senior accountant and finance analyst for Blue Cross Blue Shield of Alabama. She has worked as a management accountant for close to 20 years across multiple industries and geographical regions. Jenkins began her career with the General Electric Company (GE) as a graduate of two of GE's financial leadership development programs: Financial Management Program and Corporate Audit Staff.

Jenkins has served on two of IMA's standing advisory committees for several years: Diversity and Inclusion Advisory Committee and the ICMA Exam Review Committee. Jenkins has also served on IMA's Annual Program Committee. As part of the IMA Global Board, Jenkins will serve on the Volunteer Leadership Standing Board Committee. Jenkins graduated from Tuskegee University with a bachelor's degree in accounting and has also earned an MBA and MAcc from Samford University.

About the DeVry-Keller Student Accounting Club

"Together we can learn, connect, and achieve."

Our Mission

Explore our career destinations together.

Our Goal

Open doors of opportunities for all, to unlock our potential of becoming globally responsible citizens in this increasingly competitive community.

Our Strategy

To connect like-minded students with two global professional organizations, **IMA and AICPA**, in order to enhance our global network in the field of accounting, finance, project management and information systems;

to sharpen our communication and data driven decision making skills and knowledge through career development seminars, student leadership conferences, scholarships, competitions, mentorships, internships and the CMA, CPA, and Data Analytic certifications.

Our Website

www.devryuniversity.imanet.org

Our Story

Under the inspiration of Prof. Xiao and the dedicated support of Adlin, Student Services Manager, the DeVry-Keller Accounting Club was formed in March 2020 with two student members (Davia and Sulyman).

Our club has since grown to **40 members** in the past year under the new leadership of Sophie, Sulyman, Elvina, Francis, Mohammed, Pauline, and Rasheen. We have:

- Defined our mission
- Built the club's Board of Directors and two Committee Teams
- Hosted 15 virtual board meetings and 3 IMA webinars
- Shared more than 100 educational webinars with members
- Held several fun activities
- Issued four student club newsletters.
- Created a club video

We have completed **Phase I** of our club- building the 1st **IMA DeVry University Virtual Student Chapter #0601** (the 2nd IMA Global Virtual Student Chapter) with the support of the DeVry legal team, Academic team (Prof. Xiao and Faculty Chair, Dr. Lamour), IMA Global and the IMA LI Chapter.

Since then, we have expanded our ecosystem to include the National Faculty Chair Dr. Weber, Assistant Dean Dr. Schmitz, and Professor Ahmed Shaik, and the AZ Valley of the Sun Chapter joined our strategic partners network.

Institute of Management Accountants

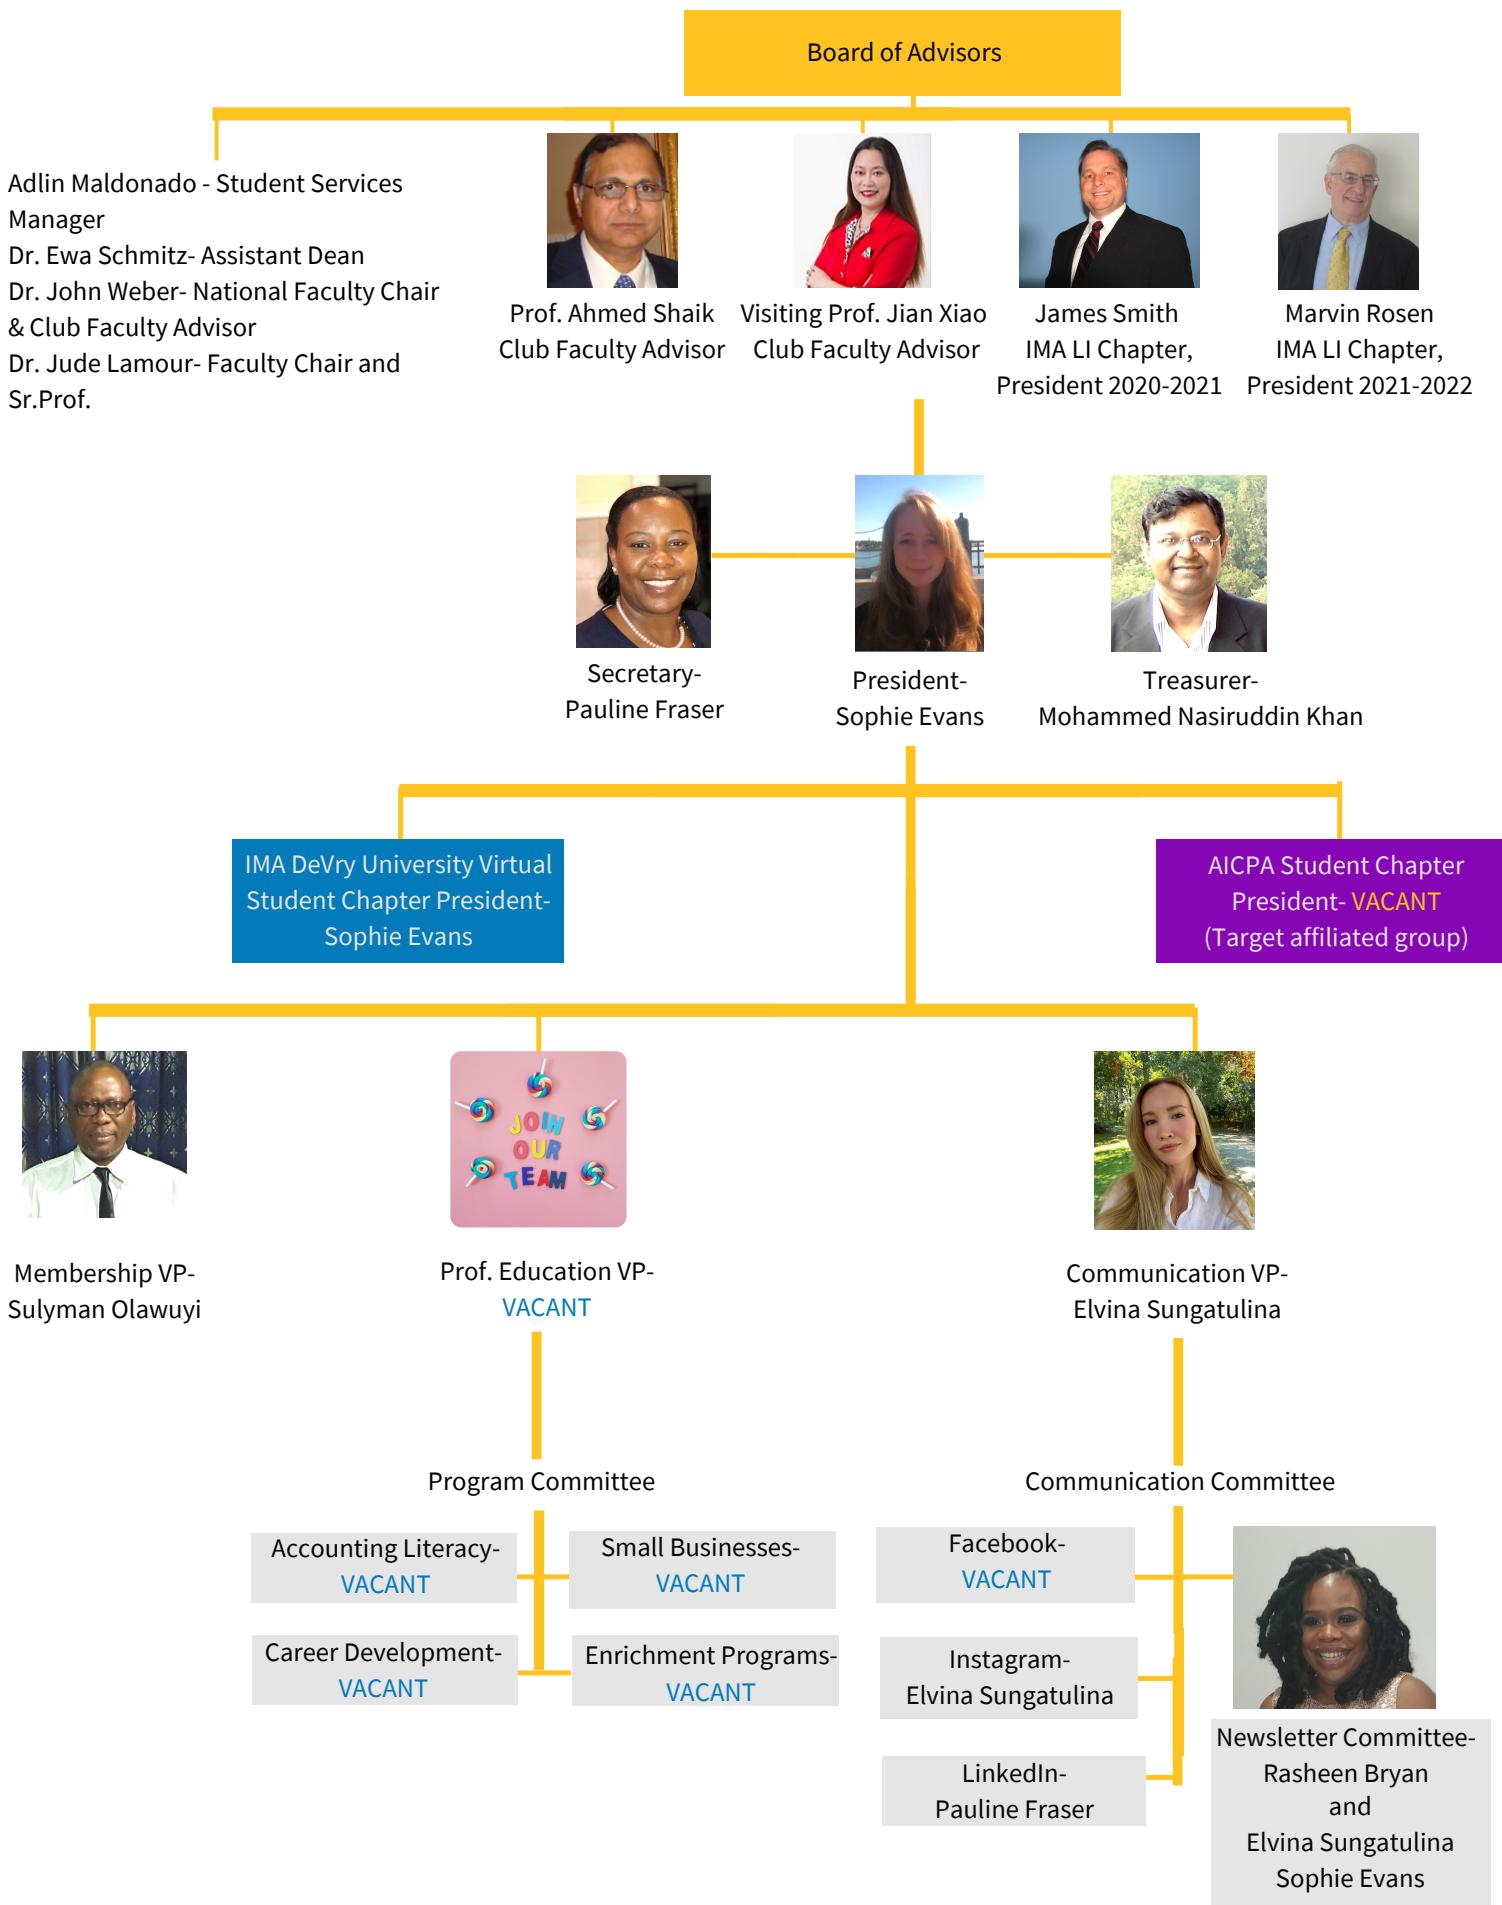

*This charter is granted to the
Devry University Virtual Student Chapter #0601
of the
Institute of Management Accountants
By resolution of the Board of Directors
of the
Institute of Management Accountants
at its meeting on
September 2020
subject to the conditions
set forth herein
effective
September 2020*

IMA Membership Process

For membership inquiries, please contact Sulyman Olawuyi at devryunivirtualstudentchapter@gmail.com

To become an IMA member, please [click here](#).

- Click on **JOIN** below the Student Membership category of your choice; One Year or Two Year membership
- Complete the application form with your information
- Select **DeVry University** for School/University and **DeVry University Virtual Student Chapter** as the chapter
- Select Pay Now. Use promo code “STUCHAP21” to discount membership to \$25 for 1 year or \$50 for 2 years
- Please forward your IMA welcome letter with your member ID to devryunivirtualstudentchapter@gmail.com and reply to the club's members' survey

*Students can only be members of one IMA chapter but can participate in other chapters' events.

Our Club's IMA Members Demographics (as of June, 2021)

Faculty Advisor's Message

This past year and a half has been a challenge to us in many ways. Some of us have found the way we work, the way we attend school, and dealing with increased pressures at home due to dealing with online learning for our children. Through all of this, we have learned not only to adapt, but to thrive while living in uncertain times.

As we all move forward, we know the post-pandemic workplace will be different from what we experienced back in 2019. Your DeVry University and Keller Graduate School of Management education has nicely prepared you for this new, dynamic workplace. First, job growth will occur in high-skill careers. As a student of accounting, you are nicely positioned to take advantage of this growth. Second, remote work is here to stay. Many of you have already worked remotely, and all of you have engaged remotely with one another in your online coursework. Thus, you have developed the skills necessary to work in this remote modality.

Third, business relationships will remain of critical importance. Your participation in the DeVry-Keller Accounting Club has demonstrated your dedication to building business relationships. Whether participating in one of the IMA presentations, or mock interviews, you have engaged with one another and continued to build business relationships that will be critical as you pursue your career. **Continue to engage with one another, and with accounting professionals, and you will be setting a solid foundation for a solid career path.**

Biography

Dr. John Weber began his career at DeVry University back in 1997 as an assistant professor, teaching accounting, computer applications, and introductory business courses. In 2000, he was promoted to Dean of Business Programs at DeVry, NJ. Held that position until 2007, when he assumed the role of Dean of Academic Affairs. In 2010, Dr. Weber returned to the faculty, and once again began teaching accounting and finance classes at the Keller Graduate School of Management. Most recently, John assumed the role of National Faculty Chair in the College of Business & Management, specifically focusing on the accounting programs.

John holds a Bachelor of Business Administration in accounting from Temple University, a Master of Arts in Teaching in business education from The College of New Jersey, a Master of Accounting & Financial Management from DeVry University's Keller Graduate School of Management, and a Doctor of Business Administration from the University of Phoenix. He is also a certified public accountant.

Dr. John W. Weber, DBA, CPA
Senior Professor & National Faculty Chair
College of Business & Management

CONGRATULATIONS

DeVry-Keller Graduates of 2021

Congratulations Pauline Fraser!

"Thank you God for giving me the perseverance and dedication to complete my Master's program. I could not have done it without the support of my family and friends who encouraged me on days when I was exhausted. A special thank you to my professors whose curriculums pushed me to another educational level and I am excited to see what my professional future holds." - Pauline Fraser

Members' Stories

Sulyman Olawuyi
Membership VP

My America Story!

I had visited America on holidays in the past but never thought I will ever be so engaged with the education and learning system until my last visit of 2019. In Nigeria, I had a BSc in Finance and Banking, and an MBA in Marketing from Nigerian universities, but also a flourishing career in the Real-Estate business with a weak Information technology skill to drive my business. I had arrived in America in late December 2019 to study MBA, Accounting concentration, and Global Supply Chain Management in view. Two weeks later, the classes started with intimidating learning technology and energetic faculty delivering learning materials with real-world scenarios.

Confronted with the fear of the unknown and struggling to navigate the amazing learning Technology tools, Jian Xiao, a professor of Accounting picked on me to lead the formation of the DeVry Accounting club which led to the formation of the second global IMA-DeVry virtual student chapter amidst a pandemic; through shared vision and teamwork. The Institute of Management Accountant offers free education and learning resources and certifications that can up-scale students' skillset as well as scholarships to become a Certified Management Accountant.

I feel very much fulfilled today that I have achieved so much during the pandemic: Advanced certificate in Accounting with Distinction, Member National Society for Leadership and Success, IMA Certificate in Data Analytics and Visualization, etcetera. I like to admonish Finance and Accounting students to join the DeVry Accounting student club and IMA to up-scale their leadership and communication skills, and networking through participation in the planning and execution of our club activities such as organizing virtual webinars and professional speaking events.

Member's Stories

Francis Coria
Prof. Education VP
(03/20-05/21)

Good Luck Francis on your Future Endeavors!

As I say my farewell to an amazing chapter, I want to recognize all that I have achieved through it. The IMA - DeVry University Virtual Student Chapter has provided me with a lifetime experience! It has allowed me to grow both professionally and personally. Meeting the other members, meeting other chapters, and along with it meeting great people from the corporate world has allowed me to learn more about myself. I started with a bit of doubt of how this chapter could really help me. It grew into a motivational journey to continue thriving and going beyond my limits. I am now in plans of starting my new small business as a passion of mine along with my family. This possibility was thanks to the many resources available to allow me to learn more about the business world, the market industry, among other

knowledgeable resources and skills that allowed me to have the confidence in going big! I will always have a special place in my heart for those who rode the bus with me on this journey. Each individual on this team has provided their own grain of sand in my development and growth. Thank you everyone for your infinite support and assistance throughout this amazing journey! I will miss you. Farewell for now and hope our paths may cross again!

IMA Course Catalog Reviews

One of the benefits we receive as an IMA student member are member savings on the IMA's vast portfolio of continuing education courses. The IMA's courses range from topics centered around data analytics, to cyber security, to robotic process automation, and many of these courses are free to members.

Recently, I completed IMA's course "**U.S. GAAP vs. IFRS: Nonfinancial Assets**". This course

helped me to understand some of the main differences in how U.S. GAAP and IFRS account for nonfinancial assets in the balance sheet including the basics of how to account for/present property, plant, and equipment and investment property (their initial recording and subsequent measurement); intangible assets (how to account for capitalization development expenditures), and the differences in reporting impairment of assets. For me, this course provided an excellent summary of the information that I have studied so far for the "External Financial Reporting Decisions" section for Part 1 of the CMA exam. Also, the information provided in this course covers a number of topics that I have learned through my accounting classes at University, which I believe will help me to comprehend the study materials even more in the future.

I would thoroughly recommend IMA student members to take advantage of these free courses whilst they are available as I think that they are a great source of supplemental educational material.

Sophie Evans
Club President

Industry Expert Article

CPA versus CMA

Written by **Richard Richer**, CMA, CGEIT, CTP, FPAC, CFO, The Wilen Group, LLC

There are several different aspects to this question. First let me say that there is plenty of overlap in those carrying either designation and the roles they play. Some of my best friends are CPAs! But here are some of the distinctions I see as a Chief Financial Officer for the last 20 plus years.

- The certification itself
- The role it has in perceived job qualifications and the recruiting process
- The functionality it prepares the individual for

The certification itself – The CPA is a state license earned by academic experience, work experience, and passing a multipart exam. It permits the holder to offer an independent opinion on the financial performance of an entity based on the application of specific procedures that validate to varying degrees the financial statements provided to them by management. I call that the building inspector in the construction world. For any entity, it is management's responsibility to present accurate financial statements driven by the various functions of management accounting, and the CMA qualifies by training and experience on behalf of management with the responsibility to do so. I call that the contractor in the construction world. In the world of publicly traded firms, it is the CEO and the Chief Financial Officer – regardless of certification – who are signing off on SEC filings such as the 10K and 10Q and bear the risks of misrepresentation.

'I call that the building inspector in the construction world.'

Perceived job qualifications and the recruiting process – The perception by those outside of the accounting profession in the US is that an accountant is a "CPA" without any further insight into what that means. For many it's "the guy who does my taxes" which by the way, doesn't require a CPA. The distinction needs to be effectively communicated through the outreach process of the IMA – the national CMA certifying

'For many it's "the guy who does my taxes" which by the way, doesn't require a CPA.'

body. Recruiters do not have the training or the time to make the distinction, so they make the same mistake when evaluating candidates. Interestingly, the AICPA, the national body supervising the CPA designation, acknowledges the distinct role of management accounting in their new issuance of a CGMA certification. Their roll-out of this certification a few years ago did not require any testing or experience

requirements beyond that which the existing holders of a CPA license chose to self-certify. It was simply there for the taking – and a \$100 payment to the AICPA. I question whether such a certification carries the same weight as the experience and testing requirements of the CMA.

Functionality each certification prepares you for – The core training for both the CPA and CMA are very similar. In practice, the CMA will typically be found aligned with the more forward-looking financial and accounting roles of budgeting, risk management, cost accounting, and strategic and financial planning. Often IT and HR are included in the role of CFO and a broadly trained CMA is equal to that task. The CPA has specialized roles of taxation and auditing within its scope, and most larger public accounting firms split

In practice, the CMA will typically be found aligned with the more forward-looking financial and accounting roles

their personnel along tax and audit lines with limited crossover. Specialization rules. To reach the top job as CFO, the CMA probably provides the broader formal training and background. A CFO is expected to be a business generalist, with high levels of understanding in all of those responsibilities and can bring in specialized tax or audit expertise when it is needed. To reach the leadership financial and accounting role as a C-Suite level executive, the CMA is the way to get there.

Nationwide Students Like You Who Pursued the CMA

"I decided to take the CMA, because I knew that it signified value and competence in management accounting and would help me show future employers that I have the skill set they're looking for."

Ryan Hawley

CMA Candidate

Audit Assistant, Deloitte

M.S. Accounting, Brigham Young University '17

"I think the CMA gets you ready for the real world, especially as a student. It's a way to know what the real world's going to be like and how to use those skills you've learned in the classroom and apply them in a real way."

Saranda Posey

CMA Candidate

Cost Accountant, Contech Engineered Solutions (a division of Quikrete)
B.A. in Accounting, Xavier University '17

"One of my friends said it best: 'A CPA certification might get you the interview for a corporate position, but the CMA allows you to keep that position once you get it.'"

Tyler Ross

CMA Candidate

Auditor, Plante Moran

M.S. in Accounting and Information Systems
Michigan State University '18
