

IBM TRIRIGA

Reporting

Discover new insights from your TRIRIGA data

Let your data tell a story by using an advanced reporting solution that integrates directly with TRIRIGA to create simple, intuitive, reports in real-time.

Visualize the metrics that matter most

Imagine what it would be like if reporting on your facilities was easy, intuitive, and visually compelling? This is all possible with IBM TRIRIGA Reporting. With reporting so user friendly and efficient, you can create visualizations around the metrics that matter most to you and your organization.

You already have a wealth of data in TRIRIGA around key areas like maintenance, capital planning, lease accounting, and/or space utilization. Now put it to work by integrating with TRIRIGA Reporting to generate operational insights to improve decisions around your facilities. All this without the need for exporting into Excel or requesting the help of a system admin.

Challenges with current reporting methods

- Dynamically changing requirements result in wasted business cycles for reporting
- Reliance on admins for basic reports
- Must import data into Excel or similar tool for sorting and visualization
- Slow turnaround on reports means missing out on the opportunity to act on real-time data

Benefits

Enhanced visualization

Evolve from basic visualizations to custom reports that give you the insights needed to make better decisions.

Self-service reporting

No more knocking on your admin's door to ask for a graph showing the status of your capital project budgets or space utilization.

Live TRIRIGA data

Report directly against your operational data. No need to download your latest report into Excel to dynamically group, filter, sort, and visualize your data.

On-demand reporting

The info you need is at your fingertips with custom reports that are easily produced when you need them.

How it works

- Create a new graph or report using an existing TRIRIGA query. Manipulate the data to showcase key metrics by combining columns to create new ones or filtering to see a subset of data.

- Access the Graphs and Reports portal to see reports that have been created by you or shared with you.
- Add your most frequently used reports to the Favorites dashboard
