CALL FOR NESTLETTA CONTESTANTS

1993 BEST PAPER AWARDS

2000 BEST PAPER NOMINATIONS

(Abridged citation) This paper was presented to the Society of Automotive Engineers, Inc., at the Detroit, Michigan, January 4-7, 1989, meeting. The presentation is intended to inform the audience of the status and progress of a project. This paper presents the methodology and results of a collaborative research project. The project was conducted by a team of researchers from several universities. The research was funded by a grant from the National Science Foundation. The methodology used in the research was based on a literature review and the analysis of existing data. The results of the research were presented in a series of graphs and tables. The graphs and tables were used to illustrate the findings of the research. The findings of the research were significant and have implications for future research in the field. The implications of the research are discussed in the conclusion of the paper. The paper concludes by stating that further research is needed to extend the findings of the study. The paper is intended for researchers in the field of automotive engineering and for those interested in the methodology and results of the research.
