Ongoing Initiatives
SIG-Day Conference and First Round Review (1RR): (M&SOM): Goals and Team

● Goals:
  – Raise the quality standards of referee reports for the SIG-Day conferences
  – Entice authors to submit early work to the MSOM SIG-Day conferences
  – Increase the number of high-quality submissions to M&SOM
  – Avoid duplicating referee work

● SIG-Day Conference Leadership Team:
  – SIG Chair: Elected by the MSOM Society
  – SIG-Day Conference Co-Chairs: Appointed by the SIG Chair
  – M&SOM Co-Chair: Appointed by M&SOM Senior Editorial Board
SIG Conference and First Round Review (1RR): (M&SOM): Process

1. Submission Step:
   - SIG authors opted-in to be considered for 1RR (paper not under review at another journal).

2. Review Step:
   - 1RR papers: handled by M&SOM AEs
   - SIG-Day presentation only papers: handled by SIG-Day Event Co-chairs

</table>
| Dual-Purpose (1RR): (1) SIG-Day Presentation, (2) First-Round Review at M&SOM | ● Double-blind  
   ● Journal Review Form  
   ● Handled by Journal AEs |
| Single-Purpose: SIG-Day Presentation                     | ● Double-blind  
   ● SIG Review Form  
   ● Handled by SIG-Day Conference Co-Chairs |
SIG Conference and First Round Review (1RR): (M&SOM): Process

1. Papers **recommended for Major Revision** for M&SOM:
   - Authors have the right to submit the original paper to M&SOM (Manuscript Central) within 3 months
   - EIC assigns papers to DEs and provides the full history.
   - The same review team (AE+reviewers) handle the paper

2. Papers **not recommended for Major Revision** for M&SOM:
   - Allowed for a second chance submitting to M&SOM as a **new** submission
**SIG Conference and First Round Review (1RR): (M&SOM): 2023 SIG-Day Conference**

A Replication Study of Operations Management Experiments published in MS

- Ten papers, all experimental studies published in MS. For each paper, conduct two independent replications.
- Use original experimental materials. If unavailable, develop new versions in consultation with original authors.
- Post all data, analysis, report, and author-response files to a website.
- A Fast Track paper accepted; will be published by end of Summer

Frontiers in Operations – New Initiative

(i) Pilot a different way of reviewing papers that is more holistic, as **papers will be reviewed all together by a panel of senior scholars** (that will include all the DEs, EIC and maybe senior scholars who serve as AEs) who will make an “up or down” recommendation.

(ii) Due to this more **holistic approach**, an outcome will be to encourage and publish **more risky research** in the *M& SOM* journal.

(iii) And as a “side effect”, promote a **faster publication** venue for papers in the *M& SOM* journal (target is to give a final decision to papers within a year).

- **Dates for Submission: November 1, 2022 – January 15, 2023**

- **Committee:** Anita Carson, Jeremie Gallien, Marcelo Olivares, Kamalini Ramdas and myself
**Frontiers**

**Traditional Process**
- Desk reject
- EIC/DE
- Reject
- Revise
- AE
- Accept

**Process Summary**
- 2 Rounds of review (typically)
- With 1 year for major and 6 months for minor

**Reviewer 1**
**Reviewer 2**

---

**Frontiers Process**
- High Level Desk reject
- Batch of papers enter at a given deadline

**Submission**
- Paper + 2-page extended abstract (impact, innovation, new contribution) + commitment letter

**Process Summary**
- 1 round of review with 2-3 months revision + panel discussion + May have 2nd round only minor with 3 months revision (BUT only if needed)

**DE + AE**
- Reviewers do not score, but DE/AE do and panel discusses and decides

**Authors have 1 month to revise**

**Stage 1**
**Preprocessing**

**Stage 2**
**Round of Review**

**Stage 3**
**Panel**

**Panel (EIC + DEs + AEs)**
- Discusses all papers together (holistic approach)

**Authors have 1-2 months to revise**

Accepted papers will be presented at INFORMS or MSOM Conference

* At any stage, the paper can be rejected or transferred to the traditional track
Frontiers in Operations --- Pilot Implementation 1

- We received a total of 31 submissions (by Jan 15, 2023)
  - Each paper was assigned to an DE+AE pair who read the 2-page executive summary, the paper, then met and discussed and created a short report they shared with all DEs.
  - All DEs read reports and met as a panel and discussed all the papers together. Authors were anonymous.
  - Then all DEs voted and based on the vote, decisions on how to move forward were made:
    - 12 papers are moving forward in Frontiers (Stage 1)
    - 11 moving to regular M&SOM submissions (R&R papers)
    - 8 papers were rejected
  - All papers were given the feedback. Those moving on in Frontiers, were given 1 month to resubmit a revised version before sending out to reviewers (Stage 2). Decisions (reject, major, minor etc.) are disabled for reviewers.
  - We received back all 12 revised papers for Frontiers (Stage 2) and sent out for review.
  - Authors received decisions and then have a month to address the reviewer comments.
  - Final panel meeting will decision these 12 papers (towards end of Nov - early Dec) (possible outcomes: minor, accept, reject or continue in regular journal).

2023 MSOM DISTINGUISHED FELLOW

TO RECOGNIZE EXCEPTIONAL CONTRIBUTIONS TO SCHOLARSHIP IN OPERATIONS MANAGEMENT.

2023 Committee:
Charles Corbett
Wedad Elmaghraby
Burak Kazaz (chair)
Panos Kouvelis
Kamalini Ramdas
“... Amy is an expert in service operations and, in particular, in the analysis of queueing systems. She has been highly productive with nearly forty publications – all of which are very well placed.”

“Amy has impacted research and scholarship in operations management through at least two avenues. The first was by fundamental contributions to the evaluation and control of queueing systems. Given the analytic intractability of these systems, Amy has studied diffusion approximations. Her 2003 paper on a Markovian queue with reneging is a home-run... Amy’s second avenue is more recent and targets the more “fashionable” question of dynamic matching that underpins real-time web-based systems like ride sharing. The underlying model is again probabilistic but the machinery is quite different from control of diffusion processes; here Amy uses infinite linear programs to propose a fluid approximation of dynamic matching.”
2023 MSOM DISTINGUISHED SERVICE AWARD

TO RECOGNIZE DISTINGUISHED SERVICE TO MSOM THAT HAS HELPED TO ADVANCE SIGNIFICANTLY THE GOALS AND OBJECTIVES OF THE SOCIETY.

Burak Kazaz
“Feryal has been an active contributor to this community for many years, and she has played, and continues to play, many leadership roles.”

“As MSOM President, she has made important contributions to the MSOM Society Diversity and Inclusion Committee. She and the Board initiated “Walk the Talk” panels to discuss and find ways to address concerns identified in the DI surveys.”

“Feryal was also involved in the Africa Initiative to generate interest in research and teaching focused on Africa.”

“In research leadership roles, Feryal (as a DE) has taken steps to increase diversity in the review process; not only chaired the MSOM Student Paper competitions, but also streamlined the award process.”
2023 MSOM YOUNG SCHOLAR PRIZE

Ozan Candogan
University of Chicago
“Vishal’s sustainable operations research has made significant impact on the OM research community and has opened new avenues of research.”

“… when one thinks of OM and circular economy, Vishal is one of the very first scholars who comes to mind, and the first of his cohort.”

"Vishal is among the earliest researchers in our field to focus on environmental sustainability. He has developed a very comprehensive body of works on how to improve environmental sustainability…, including design for sustainability, sustainable new business models, and close-loop supply chains. I cannot think of another researcher in our field who has built such a well-developed body of knowledge on sustainable design and new sustainable business models.”

Vishal Agrawal
Georgetown University
“Ozan’s research is both broad and deep. Methodologically, his work is rooted on a rigorous use of stochastic modelling, optimization and economic theory to address important new Operations Management challenges in settings where network structures play a fundamental role in shaping market dynamics and the interactions among individual firms.”

“Ozan’s work is diverse from optimal pricing in social network, to optimizing decisions in transportation networks, all the way to the study of supply chain disruption and finally to the analysis of trading networks. Nearly every paper is tackling a major operational question, a question relevant both to practice and theory.”

“Ozan has produced several seminal papers that significantly advanced the state of the art of pricing and revenue management, already resulting in a large literature building on them.”
