Development Engineering Foundations

Roles, responsibilities and public sector accountability

Designed for engineers, technical officers & works supervisors

Presented by **CT Management Group**, this online course provides insights into the land development process, the stakeholder's objectives and public governance obligations.

Learning Objectives:

- *an understanding of the urban/rural development process*
- *an understanding of relevant legislation, standards and the development approval model*
- *an appreciation of public sector governance responsibilities*
- *an appreciation of private sector aspirations, community expectations and the challenge of reconciling them*
- *an understanding of climate change implications*
- *an understanding of design, construction and maintenance opportunities and challenges*

CT Management Group provides independent advice and management support to a range of public sector organisations and is one of Australia's most trusted professional service providers to local government.
