Project Management Foundations

How to lead projects that deliver!

Designed for engineers, technical officers and supervisors

Presented by **Swinburne University of Technology**, this four x half-day **online** course provides participants with the **language, terminology, structures and tools** of effective project management:

Learning Outcomes:

- Produce a project outline to support initiation and approval
- Create a project plan for a small project addressing risk, quality and change
- Select tools and processes to effectively monitor project implementation
- Develop closure reports and documentation
- Evaluate project success and capture lessons learned
- Understand the core principles of project management
- Outline what is needed to competently manage a project in detail
- Understand different project methodologies and when each may be applicable

Discover how to get the best from your project team!
