Wednesday 12 August 2020

### Beating Corrosion in Steel Structures

**Presenter:** Justin Rigby, Principal  
Remedy Asset Protection

Justin Rigby has over 20 years' experience in the Corrosion and Protective Coatings industry and is a NACE CIP lecturer & Chairperson of two of the ACA's Technical Groups.

Justin will highlight the difficulties often faced by Councils in managing corrosion on steel structures for either new build construction or infrastructure assets. He'll share data on how RAP's proven strategies can decrease the cost of corrosion on your network by up to 30% and make available a free editable Specification document for use on civic building projects.

**RemedyAP provides comprehensive corrosion assessment & coating inspections for concrete repair and steel protection works.**

**10:30am > 11:00am | Wednesday 12 August**

***pitchinar** (n.): a forum for new ideas.*

*The **Pitchinar Program** enables service providers and suppliers to the public works sector to launch new products and present them directly to market.*

**Free Member Event** (byo coffee).
