

POST-CLOSURE LANDFILL MANAGEMENT: REDUCING COSTS AND LONG-TERM RISKS

When a landfill closes, the money coming through the gate stops but the ongoing aftercare obligations and post-closure risks continue. These must be addressed by landfill operators. Councils are increasingly looking at ways to reduce the costs and risks of the post-closure period and work more collaboratively with the regulator, the EPA. HWL Ebsworth Lawyers, Coffey and Hydraterra have joined forces to present a seminar on how landfill operators can reduce costs, work cooperatively with the EPA and manage the long-term risks of the post-closure period.

- Meredith Gibbs - Environment Partner at HWL Ebsworth will present on the legal aspects of landfill closure including PC PANs, long-term liability and managing legal risks in the post-closure period.
- Richard Campbell - Managing Director at HydroTerra will present on how to reduce long-term monitoring and achieve cost savings through innovative approaches.
- Tim Marshall - Principal Environmental Consultant at Coffey will provide an auditor's perspective on post-closure risk management and working collaboratively with the EPA.

WHEN Tuesday, 30 August 2016

WHERE HWL Ebsworth Lawyers, Level 26, 530 Collins Street, Melbourne
