Management Snacks

Lean Innovation

Innovating fast to reduce uncertainty and risk!

Management Snacks are bite-sized introductions to the soft-skills emerging leaders need.

Lean Innovation

Lean innovation favours **experimentation** over elaborate planning, **validated learning** from direct user feedback and **iterative design** over building all the 'bells and whistles' upfront. The **Lean Startup** method is used to rapidly test new ideas whilst reducing the uncertainty and risk that comes with implementing innovation.

This interactive webinar will focus on practical application of the method to current sector challenges such as **sustainable roads**.

Are you hungry?
