The Benefits of a NAMS.PLUS Subscription

NAMS.PLUS is an online guided pathway for Asset Management Planning based on the IPWEA International Infrastructure Management Manual and ISO 55000 ensuring a consistent approach to complete and update your Asset Management Policy, Strategy and Plans.

Subscription provides access to:

- A suite of asset management planning templates.
- A guided pathway to sustainable service delivery (250+ page eBook Guideline).
- On-line data editing and real-time modelling.
- Self-assessment maturity models (IIMM & ISO 55000).
- On-line Help Desk support service including 'How to Videos'.
- On-site support and training options.
- Multi-user login for each subscribing organization.

Developing annual budgets based on updated asset management plans that support the long term financial plan will enable your organization to demonstrate a financially sustainable position.

In addition, the NAMS.PLUS templates and modelling tools enable you to:

- Assess current asset management maturity and set improvement targets and plans,
- Project outlays and inputs for the long-term financial planning task,
- Run scenarios to assess the implications of service level, risk and cost options,
- Simplify the annual budget preparation and adoption process,
- Develop long term maintenance and capital works program based on agreed service levels,
- Assess remaining and useful life of infrastructure assets,
- Develop and maintain the asset management policy and strategy,
- Monitor and report progress against asset management targets,
- Engage on service level trade-offs, costs and risk with confidence.

The NAMS.PLUS tools and templates are continually updated and improved and lead the way with an internationally recognized consistent approach to sustainable infrastructure asset management and financial planning.

The NAMS.PLUS subscription is based on an initial joining fee and a low cost annual fee and is suitable for any infrastructure owner/operator regardless of size and level of asset management maturity

NAMS.PLUS updates and development is based on experience in use of the system, industry leading experts, feedback and suggestions from users. This is accessible to subscribing member organizations due to the continued broad-based international participation.
