

PCSUMP Version 6 for Stormwater Infiltration Basins

PCSUMP is the standard software for sizing of infiltration basins in Western Australia and is referenced by Main Roads Western Australia for road design packages.

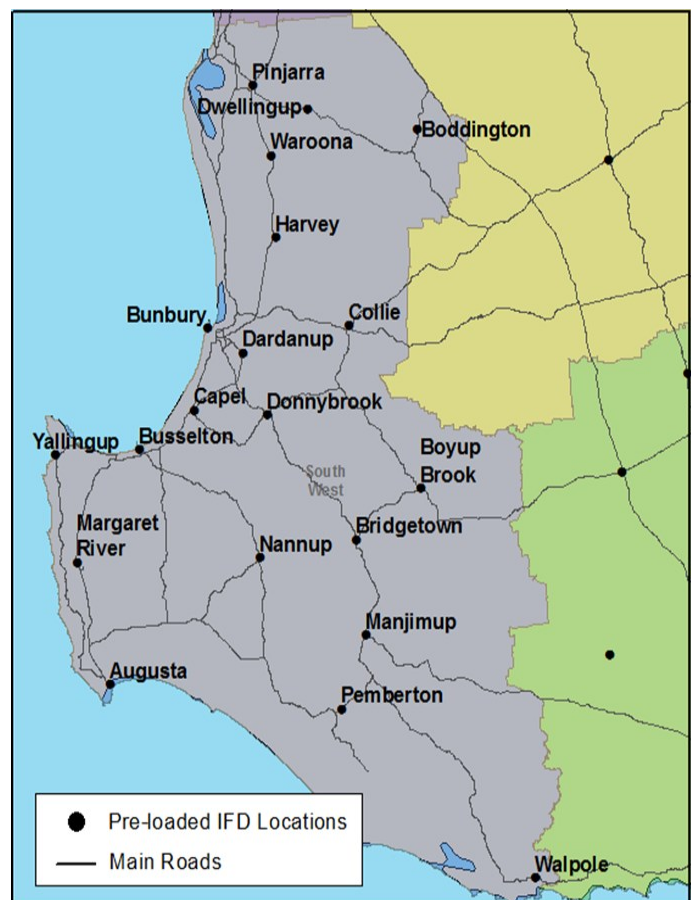

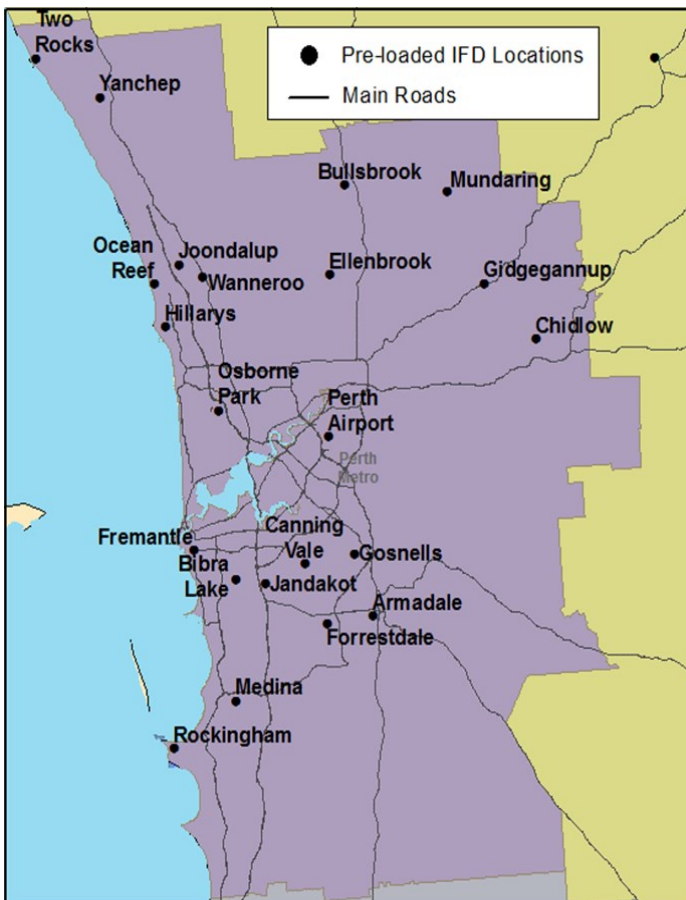

The newly developed PCSUMP Version 6 by JDA Consultant Hydrologists incorporates:

- The latest Australian Rainfall & Runoff 2016 storm rainfall intensity frequency duration (IFD) data and storm temporal patterns;
- Detailed land use runoff options;
- An optional swale infiltration module (3 swales);
- New algorithms for all 3 options of deep water table, shallow water table, and clogged layer.

PCSUMP V6 is an Excel based program.

Available options: PCSUMP V6 \$4,900 ex GST with User Manual.
