A SHORT STORY...

WHY DOES IT GOVERNANCE MATTERS?

- Aligns **IT strategy** with **business goals**.
- Enhances **decision-making** for IT investments.
- Ensures **regulatory compliance** & accreditation (DORA, NIS2, CSRD, ISO-15189, ACI, ...).
- Improves **risk management** and reduces vulnerabilities.
- Delivers **measurable business value** through IT initiatives.
- Strengthens business continuity, **operational & cyber-resilience** frameworks.

CGEIT – WHAT IS IT (AND WHAT IS IT NOT)

- CGEIT is not a framework—it is a certification that validates expertise in IT governance.
- CGEIT is based on well-established frameworks and methodologies, e.g.:
 - **COBIT** (Control Objectives for Information and Related Technologies) – A widely used enterprise IT governance and management framework.
 - **ITIL** (Information Technology Infrastructure Library) – Focuses on IT service management (ITSM).
 - **ISO/IEC 38500** – Provides principles for corporate governance of IT.
 - **Risk Management Frameworks** – Such as ISO 31000 and COSO ERM.

CGEIT – DOMAINS COVERED

- Governance of Enterprise IT (40%)
 - Establish governance frameworks and principles.
- IT Resources Management (15%)
 - Optimize IT assets, infrastructure, and teams.
- Benefits Realization (26%)
