Auditing AI: The Evolving Role of Audit in a Digital World

All is transforming how organizations operate; however, it also introduces new risks, regulatory scrutiny, and governance challenges. The audit function must evolve to assess these emerging risks, strengthen controls, and build trust in how All is developed, deployed, and monitored.

Rajiv RedoySenior Manager Risk and Controls Specialist at EY

Rajiv has over 12 years of experience in IT Risk and Controls, with additional expertise in Data Privacy and Cybersecurity at Ernst & Young (EY). He leads the regional Technology Risk team at EY, supporting engagements across the English- and Dutch-speaking Caribbean and in the Bahamas, Bermuda and Cayman Islands.

His work spans financial statement audits, SOX compliance, SOC reviews, and cybersecurity shadow investigations across industries such as banking, insurance, retail, telecommunications, and oil and gas.

Rajiv also plays a key role in overseeing engagement quality, project management, and learning development, helping strengthen the firm's Technology Risk capabilities across the region.
