SUMMER 2019 EDITION

ISACA® Jacksonville Chapter

Chapter Leadership Message

Pedro Afable, President

I can't believe it's already the end of our fiscal year and we are at our summer break.

It has been a very busy year for the ISACA Jacksonville Chapter. In addition to the Lunch Training Seminars, we had a special 6 CPE Session on CyberSecurity, Cloud, and Blockchain with Leighton Johnson of the Information Security Forensics Management Team (ISFMT) in February that was very well received. We also had two very well attended All-Day Training Seminars, one of which was presented through a partnership with The Institute of Internal Auditors (IIA) Jacksonville chapter. That partnership allowed us to present fresh topics to our combined members using new speakers. Our partnership with IIA also extended to our December Holiday Social at the Museum of Science and History in Jacksonville this past year.

We had a lot of good feedback on the joint events with other organizations and we will be looking to leverage other relationships in the future. If you are a member of other organizations with similar interests, please send us the con-

tact information and we will be happy to reach out and explore educational or social partnering opportunities.

I want to thank the ISACA Jacksonville Board who made all these things possible – Lucinda, Leslie, Tricia, Ken, Ryan, Hiram, Trace, Andreen, Joey, Hal, and Martha. It takes a lot of work to put all these training seminars and social events together, and this team always managed to get it done despite the challenges of a real full time job and family demands.

We also had our share of challenges this past year. Our transition to a new email server and address came with their issues. The greatest of which is that the combination of Constant Contact and a Hushmail address send our communication to the Junk and Spam folders of a lot of company and personal email servers. This caused a lot of the ISACA Jacksonville Chapter members to miss announcements about upcoming events.

ISACA Jax Insider Summer 2019

Chapter Leadership Message (Continued)

Over the summer break, we will once again make some changes. ISACA International has offered local chapters a couple of great options to communicate with members and we will be taking advantage of these opportunities. We will be switching to a RackSpace email account on a domain owned by ISACA. The main account is already active, so please add it to your Contact and Safe Sender list: president@jacksonville.isacachapter.org. The second change is that we will be transitioning to Cvent for our event communication and payment processing. Since the Cvent platform is focused on event management, it is less likely that messages from Cvent will end up as Junk or Spam. So, stay tuned. We will be sending updates on our progress.

Before I sign off, I would like to let you know that we are having a special 2-CPE Lunch Seminar on Thursday, August 8th. This is a bit earlier than when we normally start

scheduling training seminars, but we had an opportunity that we could not pass up. Jan Anisimowicz, who presented his material “How to Ensure Vendor Compliance and the Mitigation of Third Party Risks” at the 2019 CACS Conference in Anaheim, CA and will again present the same material at the 2109 GRC Conference in Ft. Lauderdale, FL, will be in Jacksonville, FL to present the material to our chapter. In addition, he will also be presenting a second topic “GDPRBOT: How Artificial Intelligence could help us search for personal data in a BIG DATA world.”. So, please hold the date – August 8th at 11:30 AM – 2:00 PM.

I wish everyone a relaxing and enjoyable summer. See you in August!

Best Regards,

Pedro Afile, CISM, CISA
