**FREE WEBINARS EACH DAY FROM THE SECURITY AWARENESS SPECIAL INTEREST GROUP**

**SASIG** is a networking forum for CISOs, CIOs, CTOs and their teams. It focuses on the softer cybersecurity issues and looks to improve trust in the online environment, together with their 5,000+ membership that represents all sectors, public and private. SASIG provides a daily showcase of presentations, panel sessions and discussions with leaders from the cybersecurity industry, discussing all manner of subjects relevant to these times. There's plenty of advice on good security awareness and the need for a strong security culture. More details of their events can be found [HERE](#), their programme for next week:

**Zero trust: All marketing and no trousers?** Monday 14 February 11am Is zero trust all marketing and no trousers? Join a former zero trust cynic as he discusses where zero trust came from, where it is now, and what recent changes mean for CISOs. He will also look at how zero trust environments and models can help our organisations even without a set final destination. [REGISTER HERE](#)

**Cyber Scotland Week 2022 - Learning for life online** Wednesday 16 February 11am Join us as we delve into the exciting events taking place virtually and in person across Scotland for Cyber Scotland Week 2022. The theme of learning for life online will engage both cyber and non-cyber communities and show that everyone can learn how to be more cyber resilient and aware. [REGISTER HERE](#)

**How to hack your friend’s PayPal** Friday 18 February 11am It’s surprisingly easy to steal money via PayPal. When banking security is so robust, threat actors could use PayPal to bypass measures and steal up to £10,000 from your bank account. Learn how Jake proved just how easy this is, and more importantly, how to protect your own account (and cash). [REGISTER HERE](#)

**A pragmatic approach to metrics for improving cyber defence functions** Monday 21 February 11am Security metrics plans are often driven by compliance or operational requirements rather than for better understanding the true status of a security program. Join us as we highlight the importance of properly designed metrics and help you rethink the way you define, collect and report on security metrics. [REGISTER HERE](#)

**Cybersecurity Skills Festival 3** Tuesday 22 February 9am-5pm SASIG’s Cybersecurity Skills Festival is a biannual series where we discuss skills in cyber and connect those looking for work directly with those looking to hire. The conference agenda is already packed with helpful content and the jobs fair will be on a scale never seen in our industry with backing from public and private sector alike. We look forward to welcoming both existing and future cybersecurity professionals through our virtual doors. [REGISTER HERE](#)

**The Chief’s Brief with James Hadley, Immersive Labs** Wednesday 23 February 11am While teaching at GCHQ’s cyber school, James realised traditional training methods suited neither the people nor the pace of cybersecurity. He developed the Immersive Labs platform to, for the first time, measure human cyber abilities, map them to risk, and optimise them in line with security strategy. We are privileged to hear more about James' career and views on the threat landscape. [REGISTER HERE](#)
How to apply human factor classifications  Friday 25 February 11am  The Human Factors Analysis Classification System framework is widely used in incident investigation. Join us for an interactive discussion and workshop on how to adapt and apply this world-renowned framework to your proactive and investigative cybersecurity strategy according to your industry and needs. REGISTER HERE

The 2022 spin on ransomware  Monday 28 February 11am  2021 was the most active year on record for ransomware — and it shows no sign of slowing. Attacks will only continue to evolve, so our defence mechanisms must, too. Join us as we take a deeper look at the latest trends, and how to defend against (and respond to) ransomware attacks in the new world order. REGISTER HERE

Cyber Escape Room (Met Police activity at New Scotland Yard)  Tuesday 1 March 11am  Created by the award-winning Met Police Cyber Protect Team, Cyber Escape Room is a fun and engaging cybersecurity exercise designed to deliver key messaging to staff through a variety of problem-solving exercises. No technical knowledge is required. Spaces are limited so we are running two sessions to give as many people the chance to attend as possible. REGISTER HERE

You can earn 2 formal CPD points for every hour learning at a SASIG webinar.
