SASIG is a networking forum for CISOs, CIOs, CTOs and their teams. It focuses on the softer cybersecurity issues and looks to improve trust in the online environment, together with their 4,000+ membership that represents all sectors, public and private. SASIG provides a daily showcase of presentations, panel sessions and discussions with leaders from the cybersecurity industry, discussing all manner of subjects relevant to these times. There's plenty of advice on good security awareness and the need for a strong security culture. More details of their events can be found HERE, their programme for next week:

Exploring the linkages between security behaviours, security culture and cyber risk management
Monday 20 July 11am As our understanding of socio-tech issues increases, so does our comprehension of the steps we can take to link security behaviour and security culture with the impact on security risk. We explore how organisations can consider their staff within their cybersecurity strategies more effectively, and how today’s evidence base can better guide your approach, decisions and actions. REGISTER HERE

Track and Trace - the honeypot of choice for fraudsters Tuesday 21 July 11am With the Covid-19 threat, we need to adopt processes for professional and social contact. Larger companies may already have systems in place, but smaller organisations may not be familiar with requirements or the potential ramifications. We ask how industry can ensure our data is adequately protected and what sacrifices should we make to our privacy to protect our health and safety? REGISTER HERE

How to bypass WhatsApp’s security and keep yours safe from attack Wednesday 22 July 11am WhatsApp is one of the most used apps, but how safe is it? Jake will show us how he gained control over a colleague’s account and what can be done with such access. With two billion accounts to choose from, you will want to make sure you are secure from this attack so tune in to find out how it was accomplished and more importantly how to keep your account safe from cybercriminals. REGISTER HERE

The SASIG Quiz Evening Thursday 23 July 5:30pm We can't get together in person this year, but we still want to get to know one another. This fun session facilitates informal networking discussions between members. Guests will assemble into virtual teams to network, natter and compete with one another, together with a mix of questions, music rounds and games. You'll make your five new friends that SASIG events are well-known for. REGISTER HERE

Bad Bots 101: ATO Simulation Friday 24 July 11am Bots account for over half of all online traffic, responsible for both good and bad activity. They expose everyone to risks as attackers carry out fraudulent activity. Netacea will simulate a real-time account takeover attack, demonstrating the ease it can be done. We’ll discuss the impact this has on various departments within organisations and how to manage this risk. REGISTER HERE
