

**FREE WEBINARS EACH DAY FROM THE
SECURITY AWARENESS SPECIAL INTEREST GROUP**

SASIG is a networking forum for CISOs, CIOs, CTOs and their teams. It focuses on the softer cybersecurity issues and looks to improve trust in the online environment, together with their 4,000+ membership that represents all sectors, public and private. SASIG provides a daily showcase of presentations, panel sessions and discussions with leaders from the cybersecurity industry, discussing all manner of subjects relevant to these times. There's plenty of advice on good security awareness and the need for a strong security culture.

SASIG welcomes the members of ISACA UK & Ireland Chapters to access the SASIG webinar programme and look forward to working together with ISACA to increase the awareness of the cyber risk and to help organisations to improve their protection against the cyber threat. More details of their events can be found [HERE](#), their programme for next week:

Why DLP Has Failed & What the Future Looks Like Monday 22 June 11am Data loss incidents on email are happening up to 38x more than IT leaders estimate. But why? Join other security leaders assessing their DLP strategies as we explore new and perennial challenges around data loss and identify the most (and least) effective solutions. [REGISTER HERE](#)

A new framework for thinking about systemic cyber risk Tuesday 23 June 11am Many risk mitigation strategies are based on diversification; not putting all your eggs in one basket. But that only works with specific risk, not with systemic risk. Unfortunately, the cyber domain is rife with systemic risk. John Donald explores the ramifications of this looking to other scientific fields for solutions which could be applied in a cyber context. Exploring disciplines such as thermodynamics, epidemiology, portfolio theory, traffic management and biology, he concludes with a proposal for a novel framework for describing cyber risk. The role of technology in a post-pandemic world Wednesday 24 June 11am As the Covid-19 crisis eventually passes, we will emerge to a world transformed in countless ways. Some of these changes we have yet to imagine, others have been around for a while, but their adoption will be accelerated by the current global challenges. For companies to survive and economies to recover, how should we all position ourselves for the future? [REGISTER HERE](#)

A business approach to cybersecurity Thursday 25 June 11am The cybersecurity narrative and approach must change. CISOs need to be seen as solution providers, not cost centres. Security must deliver growth, not be a governance burden or a business blocker. So, how do we get better traction with the board? How should we better present our work to obtain the necessary levels of support and investment? How does the Covid-19 crisis highlight the value of the cybersecurity function? [REGISTER HERE](#)

Mental health and the value of mindfulness exercises Friday 26 June 11am Counselling, meditation, yoga, mindfulness – what do these look like? What are their benefits? How do they work, and what is the science? [REGISTER HERE](#)
