**SASIG** is a networking forum for CISOs, CIOs, CTOs and their teams. It focuses on the softer cybersecurity issues and looks to improve trust in the online environment, together with their 4,000+ membership that represents all sectors, public and private. SASIG provides a daily showcase of presentations, panel sessions and discussions with leaders from the cybersecurity industry, discussing all manner of subjects relevant to these times. There's plenty of advice on good security awareness and the need for a strong security culture. More details of their events can be found [HERE](#), their programme for next week:

**The state of the security team: Are executives the problem?** Monday 28 September 11am  
Cybersecurity professionals are reporting higher levels of stress than before. A recent LogRhythm survey investigated the reasons behind the increased pressure on security teams, solution capabilities, deployment strategies, technology gaps, and more. Join Andrew as we explore some of the key findings from this research and how to alleviate some of these issues. [REGISTER HERE](#)

**Impact 2020 with CybSafe** Tuesday 29 September 10am – 5pm SASIG is delighted to hand over to CybSafe for the day, hosts of Impact2020. This all-day online conference covers all the latest academic research on the human aspect of cybersecurity, facilitating discussion and collaboration between academia and the cybersecurity industry. World leading academic experts will discuss the latest research implications for policy and practice. [REGISTER HERE](#)

**Cloud Threats from the Frontlines** Wednesday 30 September 2pm  
Organisations have been moving to the cloud at an increasing pace. However, many are failing to protect their environments against attack effectively. This has resulted in a significant rise in cloud-related breaches by threat actors. We explore lessons learned from and share best practices for organisations protecting their cloud environments from compromise. [REGISTER HERE](#)

**The skeletons in your unstructured data: How to find the unknowns** Thursday 1 October 2pm  
Every business faces the same problem: Not knowing what data they’ve got or where it’s stored. There are lumps and bumps under the carpet all over the place, but what do they contain? Are there skeletons that may unexpectedly come to light? We’ll share what’s in a typical organisation’s data estate and how to reduce the risk of finding any nasty surprises. [REGISTER HERE](#)

**Reducing susceptibility to disinformation during Covid-19** Friday 2 October 11am  
David has been in the military for eight years. He joins us to discuss his work with the British Army’s Information Operations Unit (77th Brigade) as a behavioural change planner. He successfully implemented behavioural change strategies against ISIS in 2019. He has recently advised Her Majesty's Government on countering misinformation during the Covid-19 crisis.
