SASIG is a networking forum for CISOs, CIOs, CTOs and their teams. It focuses on the softer cybersecurity issues and looks to improve trust in the online environment, together with their 4,000+ membership that represents all sectors, public and private. SASIG provides a daily showcase of presentations, panel sessions and discussions with leaders from the cybersecurity industry, discussing all manner of subjects relevant to these times. There’s plenty of advice on good security awareness and the need for a strong security culture. More details of their events can be found HERE, their programme for next week:

**The role of technology in a post-pandemic world** Monday 3 August 11am As the Covid-19 crisis eventually passes, we will emerge to a world transformed in countless ways. Some of these changes we have yet to imagine, others have been around for a while, but their adoption will be accelerated by the current global challenges. For companies to survive and economies to recover, how should we all position ourselves for the future? [REGISTER HERE](#)

**Crisis management** Tuesday 4 August 11am Covid has changed the way we work and reinforced our reliance on technology. What does this mean for managing our cybersecurity risk? Our expert speakers discuss risk management within deployment, legal and insurance. They consider whether increasing cybersecurity risks are fully appreciated in practice and the evolving commercial attitudes to managing these. [REGISTER HERE](#)

**SASIG Gateway virtual world café roundtable** Wednesday 5 August 2pm Following three oversubscribed Gateway meetings last year, the networking forum for junior security professionals is back in epic form. In this interactive roundtable session, we explore a vast array of topics in our fast-paced world café format that has become notorious among previous attendees. [REGISTER HERE](#)

**Privacy lost - Better to reign in Hell than to serve in Heaven?** Thursday 6 August 11am Big data is big business, large tech organisations have deeper insight into our lives than many governments, but the regulation of big data is a wild west. How do big tech companies harvest our data and how much control do we have? Are we being manipulated by profit hungry individuals to our own detriment? Who chooses to use that data to serve the population? [REGISTER HERE](#)

**As the world transformed in the face of a global pandemic, how did hackers of all stripes react?** Friday 7 August 11am Attention-grabbing headlines about the rise of cybercrime during the coronavirus pandemic proved, as ever, wide of the mark. Behind the hyperbole is a fascinating story of how the different groups that make up today’s cyber threat responded to the global pandemic. [REGISTER HERE](#)
