SASIG Webinars

Monday 17 February 2025, 2pm-3pm (GMT)

Understanding the true attack surface of global ICS exposures

<https://www.thesasig.com/calendar/event/2025-02-17-intelligence/>

Industrial control system (ICS) exposures have long been a concern for security researchers, as these systems are foundational to many critical infrastructure operations. In Censys' third annual State of the Internet Report,

the Censys research team used its unique view of global internet infrastructure to examine the global state of these exposures

It's simple: If you accept credit cards, you must comply with payment card industry (PCI) standards. Join us for a breakdown of PCI DSS 4.0 requirements, specifically regarding payment page script and header management

Wednesday 19 February 2025, 11am-12noon (GMT)

The butterfly effect: Hidden costs of network security policy management

<https://www.thesasig.com/calendar/event/2025-02-19-networks/>

A recent survey conducted by Skybox Security, revealed that more than half of the time spent by network and security professionals is devoted to routine operational tasks that could largely be automated.

Friday 21 February 2025, 11am-12noon (GMT)

Would your cyber infrastructure stop a threat actor who has multi-factor authentication (MFA) credentials?

<https://www.thesasig.com/calendar/event/2025-02-21-networks/>

In this session, we will explore the expanding market of stolen user credentials and how threat actors are utilising them to bypass MFA. We will cover the most recent tactics threat actors are using to capture these details, and break down the importance of speed in these scenarios to contain and disrupt attackers before damage can be done.
