Misinformation, disinformation, and malinformation – the illusion of truth

<https://www.thesasig.com/calendar/event/23-09-08-risk/>

With so much fake news, and even fake news about fake news, it's hard to distinguish truth from lies and fact from fiction. We are in the information age – surrounded by and subjected to content in all its explicit and implicit forms. But the continual barrage of news, statistics, opinion, rhetoric, and narrative often overwhelms our ability to rationally and objectively process what we see and hear, distorting our view of reality. And through AI systems such as ChatGPT, it's getting more difficult to know if what we are reading, hearing, or seeing is true or even real.
