Monday 12 June 2023, 11am-12noon BST

Phishing simulations: The controversial ‘awareness’ programme

<https://www.thesasig.com/calendar/event/23-06-12-awareness/>

Phishing simulations and testing is a hotly debated subject. Last time we spoke about it (you can watch the recording here), we could have continued for hours, so we’re holding another webinar to continue the conversation. Phishing simulations can vary wildly – they may be simple, sophisticated, or somewhere in between. But what do we hope to achieve by sending them to our colleagues?

SASIG masterclass - The Chat is all about GPT, but why does it matter?

<https://www.thesasig.com/calendar/event/23-06-14-aiiot/>

In this webinar, we assume little to no knowledge of ChatGPT and similar products (such as Bard or Bing), in order to discuss the foundations of ChatGPT and both the risks and opportunities it could bring. There are a lot of big questions about this big topic, so we should not avoid them any longer.
