About the training

ISACA Malaysia Chapter is organizing this intensive training to prepare you for the CISM certification examination. The accredited trainers will focus exclusively on the essential domain areas covered by the examination and will be training you by solely using only training materials that have been approved by ISACA Global. All the trainers have valuable working experience with technical skills and knowledge to complement their training delivery.

ISACA's Certified Information Security Manager (CISM) certification brings credibility to your team and ensures alignment between the organization's information security program and its broader goals and objectives. CISM can validate your team's commitment to compliance, security and integrity and increase customer retention!

Who should attend

Certified Information Security Manager (CISM) certification is for those with technical expertise and experience in IS/IT security and control and wants to make the move from team player to manager. CISM can add credibility and confidence to your interactions with internal and external stakeholders, peers and regulators.

What you'll learn

The course covers all four domains of CISM. You will learn about each of these domains in detail, giving you the knowledge and skills to develop and manage a resilient information security program.

Domain 1: Information security governance
Learn how to establish and maintain a framework that aligns information security strategies with business objectives and applicable laws and regulations.

Domain 2: Risk Management
Identify and manage information security risks to achieve business objectives

Domain 3: Information security program development and management
Learn to develop and maintain an information security program that identifies, manages and protects the organization's assets while aligning to information security strategy and business goals.

Domain 4: Information Security Incident Management
Plan, establish and manage the capability to detect, investigate, respond to and recover from information security incidents to minimize business impact
