FEE: RM1,480 (MEMBER)
RM1,980 (NON-MEMBER)

Accredited Trainer

ELIGIBLE FOR 8 CPE HOURS

REGISTER AT ISACA MY CHAPTER ENGAGE

About the training

Malaysian companies need to realize that effective environmental, social and governance (ESG) plans and programmes involve respective business operations as well as the activities across the entire supply chain locally and globally. These combined and concerted efforts will inevitably depend on information and technology for execution and monitoring. If so, is there a globally recognized framework for the enterprise governance of information and technology (EGIT) that can tailor to own company and the differing needs of all other parties involved?

This 2-days training answers this question by providing a comprehensive overview on what and how to use COBIT 2019, an acknowledged framework to govern and manage information and technology enterprise-wide. With extensive references on resources and guidance materials, there will be examples and suggestions on its application potentials. *This is not a training on ESG per se*. Structured and process centric with focus on controls, COBIT 2019 is a proven EGIT framework which will help enable an enterprise to better plan towards business innovation and transformation initiatives such as ESG.

What you'll learn

- Understand governance system, concepts, principles and components
- Comprehend governance and management objections and their relationships
- Get to know COBIT 2019 Core Model structure and alignment with relevant and related standards
- Introduce performance management using capability and maturity perspectives for monitoring and reporting
- Walk-thru to design a tailored governance system
- Explore the approach to EGIT applications via focus areas

What next ?

- COBIT 2019 trainings by focus areas provide guidance to implement new or fortify existing EGIT applications relative to the enterprise's specific needs and priorities (Cybersecurity, Information Security, Information and Technology Risk, DevOps, SMEs and more)
- COBIT 2019 Foundation training provides the theoretical knowledge to optimize EGIT applications in practice

Who should attend

This Training is suitable for audit/assurance, compliance, risk management, business management and IT professionals as well as decision-makers or persons-in-charge of the governance and management of information and technology.

Accredited Trainer Profile

Dr. Wong Kim Hoe has more than two decades of experience in the field of IT ranging from software development, infrastructure, operation, support, marketing and consulting to strategic decision-making in the ranks of an executive officer and technical advisor to top management. Having worked in diverse industries in notable local and multinationals, she soundly understands the full spectrum of IT ranging from technological complexities to the challenges confronting businesses.

Whilst as the CIO of an MNC, she has led the implementation of COBIT 4.1. An accredited COBIT 5 (since 2015) and COBIT 2019 (since 2019) trainer, she is passionate in contributing on enterprise governance and management of information and technology in practice and research. Armed with relevant working experiences and related academics, she believes she can effectively reach out on the application of COBIT across all levels of management and staff.
