

ISMS Fundamental and Audit Workshop

Workshop Overview

ISO27001 is also known as Information Security Management System (“ISMS”) provides requirements and controls to an organization with goals and objectives to ensure capabilities provided are aligned to protect the organization assets and the organization’s risk profile.

As the Information Security and Cyber threats continue to evolve and become more sophisticated, organizations are strengthening their defences against these threats. Any successful threats or cyberattack have the opportunity to affect people, processes and technology throughout the organization. This workshop focus on how Information Security Controls and Risk Management should align to better cope with the increasing threats and improve resilience.

ISACA Malaysia Chapter is proud to introduce an ISMS Fundamental and Audit Workshop. This two-days program, is specially designed with the objective to equip you with the knowledge and valuable skills on focusing the implementation of Information Security Controls, Risk Management, Audit and moving forward plan on ISO27001 implementation and certification.
