

# Managing Your Privacy

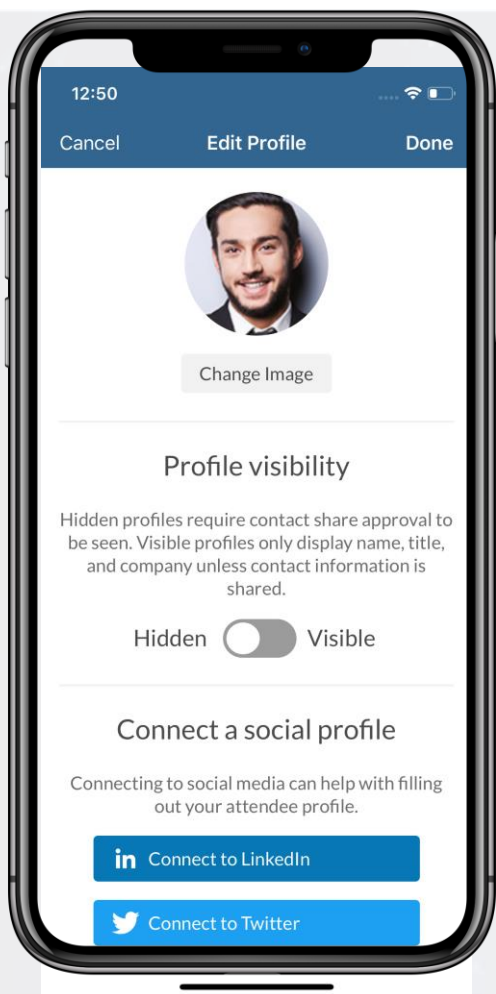

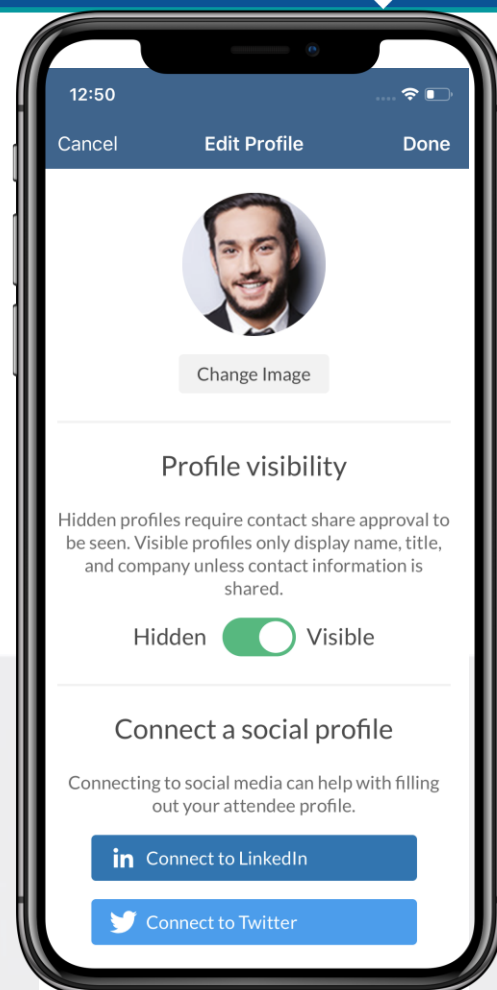

## Set your profile to visible

**1 Access your profile.** If you want to appear on the attendee list but still have control over who can see your full profile, you can set it to visible.

After logging in, tap the hamburger icon in the top left, then tap your name at the top of the screen.

**2 Update your settings.** Under Profile Visibility, toggle your selection to “Visible” to make your name, title, company, bio, and profile picture visible. Other attendees must send a contact request to view your full profile.

Tap **Done** to save.

## Or hide it entirely

**1 Access your profile.** Rather focus on the conference? After logging in, tap the hamburger icon in the top left, then your name at the top of the screen.

**2 Remove yourself from the list.** Under Profile Visibility, toggle to “Hidden,” then tap **Done** to save.

Fellow attendees will no longer be able to find you on the attendee list at all. Your profile will only be visible to attendees who accept your contact requests.
