Keep an eye out for a notice from the Nominations Committee regarding voting, which will commence in a few weeks.

**Leadership**

**Leadership Series Seven**
Barbi Goldstein, Managing Director and former Global Head of Innovation at Protiviti, led Lion's Pride Leadership's seventh principle of leadership, titled "Journey." Drawing on her extensive experience, Barbi offered powerful insights on her personal journey, fielded challenging questions on real-life scenarios, and shared anecdotes on how to thrive on the leadership path. Her expertise was evident throughout the event, and attendees gained valuable lessons on how to grow as leaders.

The Q&A session was so engaging that it went into overtime, with questions continuing to pour in even after the buzzer. We extend special thanks to Chad Reyes, Barbi Goldstein, Teena Bacchus, and the Leadership and Membership team for delivering yet another outstanding presentation. It is this level of excellence that has earned us the distinction of the most innovative chapter this year! On a personal note, Barbi Goldstein is a friend of mine who has helped me navigate some challenging career and life decisions. She is a trusted advisor and an expert at providing relevant insights that help you visualize the right path. It was a pleasure and an honor to have her address our members. For those who missed it, Barbi's presentation will be available on our chapter website under “Leadership” in the next few weeks. [http://ISACANY.ORG/LEADERSHIP](http://ISACANY.ORG/LEADERSHIP).

Based on the frequency and quality of questions asked, it is evident that this series should continue. CISA and NSA Enhance Security Framework With New IAM Guide
The National Security Agency (NSA) and the Cybersecurity Infrastructure Security Agency (CISA) developed a new guide titled “Identity and Access Management: Recommended Best Practices for Administrators.” The content within is advisory in nature and is intended to issue cybersecurity recommendations. The guide mentions how multiple attacks have surfaced in recent years that have leveraged vulnerabilities in IAM products and implementations to target critical infrastructure.

The guide provides a framework to enable businesses to assess current IAM capabilities and risk posture. The guide says, “Critical infrastructure organizations have a particular responsibility to implement, maintain and monitor secure IAM solutions and processes to protect not only their business functions and information but also the organizations and individuals with whom they interact.”

Ransomware Attacks Double in Europe's Transport Sector
According to ENISA, ransomware incidents have been a significant issue in Europe’s transport sector. Moreover, ransomware incident reports represented 25% of Europe’s transport sector’s cyber incidents in 2022. The victims affected by these attacks were primarily airports, railways, and transport authorities. ENISA executive director Julian Lepassaar said, “Transport is a key sector of our economy that we depend on in both our personal and professional lives.”

Other notable 2022 cyber incidents included malware (6%) and data breaches (21%). According to the report, state-backed attacks accounted for another 15% of the total and were primarily aimed at the maritime sector and government transport authorities. ENISA also acknowledged that its visibility into the threat landscape is limited to publicly reported incidents.
