- Experience in an information technology support organization
- Equivalent experience in the field

**KNOWLEDGE SKILLS & ABILITIES**

- Demonstrated knowledge of generally known information technology platforms, standards, and software

development language(s)

- Well-developed verbal and written communication and analytical skills
- Strong interpersonal skills to interact positively and productively with teams across organizational lines, including administrative/executive staff and patient care systems users
- Must be able to function in a dynamic environment subject to impromptu changes in schedules and priorities
- Strong understanding of identity management account and entitlement lifecycle, federated identity management, onboarding and offboarding, privilege accumulation, role-based access control, and authentication, authorization, and accounting
- Strong competency with one or more identity management software tools, e.g., SailPoint, Varonis, Thycotic, Courion, Dell, Oracle, Sun, Microsoft, StealthBits

#### JOB RESPONSIBILITIES

1. Provides guidance when assisting other team members in problem resolution.
2. Serves as expert on matters related to identity and access management systems architecture, design, implementation, and ongoing support.
3. Provides design, deployment, and administration recommendations for identity access management technologies needed across the enterprise, ensuring they deliver on stated use cases and business requirements.
4. Partners closely with enterprise architects, project managers, infrastructure leaders, and application development teams to ensure consistent approach to account lifecycle management.
5. Implements identity access management systems by specifying account access methodologies and equipment, directing equipment and software installation and calibration, and preparing preventive and reactive measures.
6. Assists with developing strategies around identity access management security for web/mobile applications and mobile hardware and software technologies.
7. Assists with application integration/deployment methodologies for web/mobile-based environments.
8. Works with developers and subject matter experts to establish technical vision for application architectures and technology, including web applications, mobile technology, and identity and access management.
9. Verifies security systems by developing and implementing test scripts.
10. Writes detailed security requirements for deployment of applications and network infrastructure components and participates in focus groups to help define security requirements for new and emerging identity access management technologies.
11. Defines and implements identity access management security architecture policies, standards, guidelines, procedures, and baselines.
12. Makes recommendations regarding identity access management plans, policies, standards, guidelines, and

procedures.

**COMPANY INFORMATION**

Children’s Healthcare of Atlanta is one of the largest pediatric clinical care providers in the country. We have a total of 638 licensed beds among our three hospitals and 28 neighborhood locations. We are home to the only Level 1 and 2 pediatric trauma centers in Georgia, and we treat about 60 percent of pediatric trauma patients in the state.

- We are ranked as a top pediatric heart care and heart surgery program by US News & World Report.
- Our 27-bed unit is one of the largest dedicated pediatric Cardiac Intensive Care Units (CICUs) in the Southeast.
- We performed 634 cardiac surgeries in 2017. We are ranked No. 3 nationally in pediatric cardiac surgical and medical volumes.
- Our Cardiac Stepdown Unit was recognized with a gold-level Beacon Award of Excellence. Our CICU was recognized with a silver-level Beacon Award of Excellence for nursing outcomes.
- Our staff includes more than 50 pediatric cardiologists and three pediatric cardiothoracic surgeons.
