***JOB DESCRIPTION**

Primary Responsibility:

This role is responsible for evaluating, developing, monitoring, and maintaining creative and innovative solutions to protect Americold systems from unauthorized access and information loss. This would include implementing and maintaining information security processes and procedures related to access control (MFA, PAM, SSO, etc.), application security, cloud security, data security (DLP, Encryption, FIM/FAM, SIEM, etc.), endpoint security (AV, HIPS, MDM, Patching, etc.), and network security (firewalls, IPS, NAC, WAF, etc.). Additional duties would include incident response along with guiding security standards, processes, and procedures to ensure the security of the overall environment.

Essential Functions:

- Performs information security risk assessments of internally developed solutions and cloud-based solutions and services by partnering with business teams to identify secure solutions to business problems, working with the Infrastructure Team to deploy strategic security projects from end-to-end, reviewing network configurations to implement segmentation following secure best practices, investigating, documenting, and assisting with implementing security best practices for both corporate and warehouse environments, and implementing security technology solutions for prevention of unauthorized access and detection of security events.
- Performs security scans and security testing to identify vulnerabilities and proposes solutions to mitigate identified issues by implementing security technology solutions for prevention of unauthorized access and detection of security events, investigating security breaches both actual and possible, and responds accordingly to contain and recover from any security incidents.
- Supports multiple security technologies and platforms both on premise and cloud based by identifying current and potential future vulnerabilities and collaborating with appropriate leaders to identify, recommend, and develop risk remediation plans.
- Evaluates vendor security controls to ensure continued security compliance with Interface standards, and authors and reviews security technology and process standards and policies based on business needs and requirements.
- Maintains knowledge of current and emerging security, compliance, and technical developments and promotes security best practices via awareness, example, and compliance with policies and regulatory requirements.
- Performs other duties and responsibilities as needed, as assigned, or as requested.

Qualifications & Preferred Experience:

- Five (5) years demonstrated information technology experience with focus in areas such as systems, network, mobile, and/or application security, designing and implementing information security and network security architectures, or demonstrated experience with administration, design and

implementation of security controls including experience in applying methodologies and principles for various levels of security.

- Hands on experience with at least two (2) or more security technologies (e.g. MFA, SIEM, IPS, Firewalls, etc.)
- Bachelor's Degree (Information Technology) or equivalent degree with an information security emphasis preferred, or equivalent relevant experience.

Knowledge & Employment Standards:

- Demonstrated knowledge of project management practices sufficient to coordinate and administer multiple initiatives within stated timeframe(s).
- Demonstrated oral and written communication skills sufficient to organize and present technical issues and concepts to various levels of management, including those with non-technical knowledge and understanding.
- Demonstrated negotiation and persuasion skills, analytical skills, and leadership skills sufficient to navigate differences of opinion and varying priority needs necessary to coordinate project completion between many different levels of management and various types of staff.
- Demonstrated knowledge of various industry security standards and organizations necessary to maintain knowledge of current trends, contacts, and security enhancements.
- Familiarity with one (1) or more types of information security frameworks such as ISO 27000 series, CIS Controls, NIST 800-171, or other similar technologies.
- Demonstrated ability to apply time-proven, generally-accepted security management methodologies, concepts, and techniques in the application and conclusion of implemented security solutions.

Physical Requirements & Abilities:

- Must be able to sit for long periods of time, with frequent interruptions, with the ability to maneuver through the process of sitting, getting up and down from chairs, reaching, or bending.
- Must be able to demonstrate manual dexterity with hand and finger movements for typical office work.
- Must be able to verbally communicate, audibly understand and comprehend, and visually identify the important elements of completing assigned tasks.
- May require travel by automobile and airplane.
- May require a visit to facility operations in temperatures at or below freezing.
- May carry loads related to travel and occasionally lift, carry, position, or move objects weighing up to twenty (20) pounds.
- Demonstrated ability to identify and solve problems in a fast-paced environment where deadlines and scopes may change regularly while maintaining accuracy. Demonstrated ability to self-start with little or no direction preferred.
- Must be able to relate to others beyond giving and receiving instructions sufficient to partner with colleagues without exhibiting behavioral extremes.

Americold is an Equal Opportunity/Affirmative Action Employer.

EOE/AA M/F/D/V DFW.

COMPANY INFORMATION

Americold provides temperature-controlled warehousing along with consolidation and multi-vendor consolidation transportation programs. Value added services complement typical warehousing and distribution services, labeling/relabeling, repacking, kitting, staging, cross-dock, sloughing/tempering, plus light assembly and food processing services.

Americold owns and operates around 250 temperature-controlled warehouses globally, with more than 1 billion cubic feet of storage, in the United States, Netherlands, UK, Ireland, Spain, Portugal, Poland, Austria, Australia, New Zealand, Argentina, and Canada. Americold's warehouses are a part of the supply chain connecting food producers, processors, distributors, and retailers to consumers.

Americold is an Equal Opportunity/Affirmative Action Employer.
