About the training

What you will learn with AI Fundamentals?

AI focuses on building smart machines capable of performing tasks that typically require humans and is drastically increasing in demand as it continues to change the future of virtually every field of technology. With AI Fundamentals, you'll learn how to understand AI's risks and potentially can fast track your career.

Who should attend

This training is suitable for professionals with work experience in information systems auditing. Some relevant job title might include:

- IS / IT Auditors
- IS / IT Consultants
- Security Professionals

What you'll learn

- AI Principals, Concepts & Potential Uses
- Essential Software & Algorithms for AI Application & Possibilities
- AI Associated Risks & Ethical Requirements

Certified Trainers' Profiles

Chin Hon is currently the Head of Group Investment, Data Governance in a regional insurance company. He has more than 20 years of professional working experience. His field of experience encompass IT security, Internal Audit and Finance.

His entry into the professional arena started as an external auditor in a Big 4 accounting firm. His journey continued to a FMCG company (Internal Audit) before landing at a Malaysian aviation company (multiple roles within Finance, Internal Audit, ERP Project team). Next, he moved to an insurance company with a stint in Finance and took up the roles of CISO and TISO before eventually embarking on the data governance path in his current role.

Chin Hon is the Accredited Trainers for CISA, CISM, CGEIT, CRISC, CDPSE, CET and ITCA. Chin Hon is also a Fellow Chartered Accountant and a Malaysia Overseas Regional Council member of the Chartered Accountants Australia and New Zealand. In addition, he was awarded the title "Ts." (Professional Technologist) by the Malaysia Board of Technologists.
