

NATURE + PEOPLE

Prom Coast Ecolink is weaving together a network of nature corridors, stretching from the rainforests of the Strzelecki Ranges to the coastline of Cape Liptrap and Wilsons Prom National Park.

To connect nature, first we must connect community.

In a region where 94% of land is privately owned, **real conservation begins with connection.**

'People Positive' Landcare uses celebration and storytelling to nurture community, care, and conservation.

When communities connect meaningfully with nature, they are more likely to protect it.
