

Connecting people, plants and technology for geographically distributed volunteer powered revegetation

USE TECHNOLOGY TO BOOST YOUR VOLUNTEER PROGRAM. DO MORE WITH LESS.

The **TreeProject Portal** is a suite of interconnected, user-friendly **web applications** designed to help organisations **manage volunteers working on revegetation**.

Scales participation across any community or cause

Reduces admin with easy online coordination

Empowers volunteers to self organise and contribute

Volunteers choose how they contribute - one-off or ongoing

Join groups that match their interests (fundraising, comms, admin, events)

Groups self organise using group email, online meetings and document sharing

Groups guided by a Liaison Officer for staff and committee oversight

TreeProject uses the Portal to manage 500+ volunteer growers and 50 coordinators. While our Grower Portal is tailored to our model

the Volunteer Portal works for any organisation that relies on volunteers.

Streamlines volunteer management and strengthens community impact.

Interested in using the Portal at a low cost?

Let's explore how the TreeProject Volunteer Portal can support your work.
