LUNCH AND LEARN

Where Great Ideas Are Served

WHY SCHOOLS SHOULD CONSIDER THEMSELVES ENTERPRISES – A FINANCIAL SOFTWARE PERSPECTIVE

Explore why public school departments are adopting an “Enterprise” software approach to improve financial transparency, reporting, and General Ledger tracking while still maintaining their financial connection to the town. Participants will learn how separate Charts of Accounts can support more detailed expense, revenue, and DESE End-of-Year reporting and reconciliation for public schools. Geared primarily toward municipal school departments, this workshop will also provide useful insights for regional school districts interested in enterprise-style financial operations.
