ABOUT MONEY SMART CACHE!

Imagine high school students learning important financial lessons while playing an online game similar to Mario Brothers. High school players use up/down keys to move a character through a maze or route. That’s the concept behind the Money Smart Cache! Online contest. Using a computer, smart phone or tablet, players play the game and learn important financial lessons. This exciting and engaging game features personal finance info every high school student should know.

There is a $250 national prize for the teacher who gets the most students participating. There is also $250 national prize students can compete for. Winners will be announced the week of May 4th, 2020.

GETTING STARTED

STEP 1

Spread the word to local high school districts and classroom. This online game is a simple tool for teachers to use instead of creating a financial education lesson plan.

Why should they participate?

- $250 cash prize for teacher with highest student participation
- It’s an easy way to meet National Education Standards for Financial Literacy

STEP 2

Encourage high school teachers to register by 03/13/2020.

Send them the link to this sign-up form:

Teacher Registration
STEP 1
Encourage high school teachers to register by 03/13/2020. This online game is a simple tool for teachers to use instead of creating a financial education lesson plan. Spread the word to your local school districts and provide them with the survey to register!

STEP 3
Once registered, the teacher is provided a pass code that gives their students access to the Cache! competition via their mobile device.

The game can be used as a stand-alone activity or a fun re-cap for a personal finance unit.

Share this Teacher’s Guide with registered teachers so they can learn more about how the program works.

Teachers Guide

STEP 4
Watch your local educators and students win big!

Winning students and teachers will be announced May 2020.
BENEFITS

Money Smart Cache! requires minimal resources and preparation yet offers a fun and simple alternative for teachers to provide a financial education lesson as well as an assessment. Here are a few additional perks:

- Participation can help classrooms meet National Standards for Financial Literacy.
- High school students typically do not attend traditional Money Smart Week events, but they will be engaged by this sort of interactive digital activity.
- Student participation incentive is a $250 national prize.
- Teachers who participate will be eligible to win a national prize; the teacher with the most students participating will win $250.
