Potential Project 372 – Small Sample Testing	16:30 - 17:30	Jader Furtado (Air Liquide)

**Information Disclaimer**

This meeting is sponsored by the Materials Technology Institute, Inc. In the meeting today, all representations and comments referring to any specific matter are strictly the personal opinion of the speaker, and not the opinion of MTI. MTI makes no warranty of any kind express or implied with respect to the data, analyses, recommendations, or any other information provided by the speakers here today. The use of any information obtained from this meeting is at the user's sole risk, and MTI assumes no liability and expressly disclaims all liability, including liability for negligence, resulting from the use of such information.

**Policy Reminders**

Certain Joint Venture companies participate in MTI and do not pay dues on the basis of their non-MTI member parents, and in such cases MTI information is not permitted to be disseminated to non-MTI member parents prior to general publication by MTI.

Certain MTI members have designated independent consultants to attend MTI TAC and other meetings in lieu of or in addition to member employees. Such consultants are permitted to attend such meetings on the understanding that they commit to use the results of such meetings, and non-public information learned there or otherwise from MTI, solely for the benefit of the specific member company which designated them, and not otherwise in their consulting or other independent activities.

**Antitrust Guidelines**

MTI's Member Companies routinely compete with each other in their respective industries, and therefore it is possible that aspects of MTI's activities could raise legal issues under the U.S. Antitrust Laws. Violations could attract civil and criminal penalties, or lawsuits against MTI or Members. MTI's legal counsel has prepared Antitrust Guidelines available on the MTI Website, and these should be reviewed by each Member Representative. Specific concerns include any discussion of prices, market allocations, or product distribution practices, and care should be taken with respect to descriptions or opinions expressed about specific products, companies or standards which could be applied in making purchasing decisions. MTI legal counsel is available to answer questions regarding any area of MTI's operations.
