DUAL LAMINATE TRAINING COURSE

May 4-5, 2021
Baton Rouge, Louisiana

The Materials Technology Institute (MTI) is offering a comprehensive two-day Dual Laminate Training Course. The course will cover a wide range of valuable information, including dual laminate materials and design fundamentals, manufacturing techniques for pipe and equipment, applicable codes and testing, fabricator qualification, installation, inspection, and repair options, as well as a review of case histories.

In addition, the course will be taught by instructors who have successfully completed numerous dual laminate projects and learned important lessons from a few mistakes along the way. These experts have more than 150 years combined experience and bring a wide range of subject matter knowledge to the table. Information covered in this course is not currently available anywhere else in industry.

COURSE OUTLINE

1. Overview
2. MOC / Materials Selection
3. Design of Vessels, Piping and Flanges
4. Fabrication of Dual Laminate Vessels
5. Fabrication of Dual Laminate Piping
