

Where Complex Assets Meet Real-World Solutions

AMPP CENTRAL CONFERENCE

September 28-30, 2026 | St. Paul, MN | Saint Paul RiverCentre

Assets in the central region face unique challenges. Some span hundreds of miles. Many operate in complex environments. The 2026 AMPP Central Conference is built for professionals solving these problems.

Hosted by the Twin Cities Chapter, join engineers, asset owners, contractors, and decision makers for technical sessions, practical solutions, and meaningful connections focused on corrosion mitigation. You'll learn real-world solutions to address access challenges, large footprints, and unique operating issues.

You'll experience:

- Technical sessions on protecting assets with huge footprints, long pipelines and transmission corridors, digital twins and AI, data management for large programs, coatings and surface preparation, and more.
- Proven practices and emerging approaches from engineers, contractors, and asset owners who have worked these challenges firsthand.
- Welcome Reception and Happy Hour, plus a ticketed Tuesday evening social event (additional registration required).
- Professional Development Hours included with full conference registration

Exhibit & Sponsor

Want to be part of the solution? Connect with decision makers and become an exhibitor or sponsor. Booth includes one full conference registration, standard booth furnishings, and exhibit hall listing.
