

Lunch Roundtable: Fieldwork - Where Strategy Meets Steel

Wednesday, September 10, 12:15PM

Field workers talking about field issues — this round table lunch discussion brings together seasoned oil and gas professionals from Western Texas who have spent decades working in the heart of the Permian Basin. With a shared focus on corrosion control and pipeline integrity, these field veterans offer invaluable insights drawn from years of hands-on experience in one of the world's most productive and challenging energy regions. From the evolution of mitigation strategies to real-world case studies of pipeline failure and prevention, this roundtable invites attendees to engage in an open, practical dialogue with the experts on stage, about what truly works in the field. Come to lunch with an intent to connect with peers and learn from our speakers' experiences in a candid environment where lessons are shared, questions are welcomed, and the collective wisdom of the field drives the conversation forward.
