

Protecting the Pipelines that Move Energy Forward

AMPP EASTERN CONFERENCE

October 19-21, 2026 | Myrtle Beach, SC | Sheraton Myrtle Beach

Pipelines are the backbone of our energy infrastructure, and protecting them has never been more complex. Aging systems, emerging fuels, evolving regulations, and workforce pressures are reshaping how we achieve pipeline integrity. The 2026 AMPP Eastern Conference is where the industry comes together to meet those challenges head-on.

Hosted by the AMPP Carolinas Chapter, you'll join owners, operators, engineers, contractors, and solution providers to learn the latest on pipeline integrity, corrosion control, and asset performance.

You'll experience:

- Technical sessions on cathodic protection, coatings, inspection, AC/DC interference, AI and data analytics, hydrogen, carbon capture (CCTUS), regulatory updates, workforce challenges, and more.
- Real-world perspectives from pipeline and integrity leaders on corrosion control, safety, and the future of energy infrastructure.
- Two receptions plus a Tuesday evening social included with full registration
- Monday Rectifier Course available (limited spots, additional fee)
- Professional Development Hours included with full conference registration

Exhibit & Sponsor
