

Extreme Conditions Don't Compromise. Neither Do These Solutions.

AMPP WESTERN CONFERENCE

November 16–18, 2026 | Renton, WA | Hyatt Regency Lake Washington

Harsh temperatures. Corrosive marine exposure. Remote locations. Offshore pressure. The assets that matter most often operate where conditions are hardest. The 2026 AMPP Western Conference is built for the professionals keeping these assets protected and performing.

Hosted by the Greater Puget Sound Chapter, join corrosion and coatings professionals from across the industry for two days of technical sessions and practical insights focused on protecting critical infrastructure under the most demanding conditions.

You'll experience:

- Technical sessions on cathodic protection, coatings and inspection, fleet readiness and maritime challenges, materials selection, drones and robotics, power generation, rail, and more.
- Real-world perspectives from owners, operators, and engineers tackling extreme-environment corrosion challenges firsthand.
- Welcome Reception and Happy Hour, plus a ticketed Tuesday evening social event (additional registration required).
- Professional Development Hours included with full conference registration.

Exhibit & Sponsor

Put your solutions in front of decision makers by becoming an exhibitor or sponsor.
