ABOUT THE NATIONAL ALLIANCE

Employer healthcare purchaser coalitions driving health, equity and value across the country

WHO WE ARE

For 30 years, the National Alliance has united business health care coalitions and their employer/purchaser members around common issues, driving systemic change to drive high-value care that improves patient experience, health equity, and outcomes.

The group is the only nonprofit, purchaser-aligned organization in the US with a national and regional structure.

Represents more than 45 million Americans, spending over $300 billion annually on healthcare.

Coalition membership comprises employers of all types and sizes from the private and public sectors and union and Taft-Hartley organizations.

“Membership in the National Alliance is a catalyst for coalitions and purchasers to leverage their collective influence, resulting in long-overdue change in our healthcare system nationally and in markets across the US.”

Michael Thompson
National Alliance President & CEO

Health Policy

Special Focus

Mental Health
Race, Health & Equity
The Future of Work

NATIONAL & REGIONAL REACH

Coalition leaders are seasoned experts with diverse skills, broad networks, and deep healthcare industry knowledge.

Strategic business partners represent an array of thought leaders from public and private sectors.

Leading, leveraging and localizing evidence-based and successful strategies, initiatives and practices by collaborating with policy makers, trade groups, physicians, scientists, innovators and others across the healthcare industry.

Together, coalitions shape and support effective purchasing strategies, healthcare improvement, health equity, value, and delivery system innovations.

“As the saying goes, ‘none of us is as good as all of us.’ When coalition members nationwide collaborate, it sends the message that we are earnest in our goals to create healthcare transformation.”

Gaye Fortner
HC21 Business Coalition
President & CEO, National Alliance Board of Governors Chair

MEMBER COALITIONS SPAN
THE UNITED STATES
Driving Transformative Change in the Marketplace
Advancing a value and policy agenda via national initiatives to amplify the employer/purchaser voice

Stakeholder Groups

Coalitions
Almost 50 regional coalition members representing private and public sector, nonprofit and Taft-Hartley purchasers

National Purchaser Leadership Council
Influential employers/purchasers who define healthcare priorities; identify issues and opportunities for managing supply chain challenges and value-based approaches; and support direction and execution of national initiatives

National Medical Director Advisory Council
Physician executives who advise coalitions and other key stakeholders to optimize workforce health, productivity and performance

National Health Leadership Council
Forum to enable cooperation and exchange of ideas between industry stakeholders to promote market change

Strategic Partnerships

Project Funders
