

Objectives

At the end of this course the participants will be able to:

- List the four basic principles of infection prevention
- State one infection control intervention that can be incorporated into daily practice
- Summarize what is meant by "antimicrobial stewardship" in the clinical practice setting
- Name two fetal cardiac interventions and the specific cardiac defect where each is appropriate
- Outline the timeframe and what symptoms or ultrasound findings would necessitate referral to a fetal cardiologist
- Critique how the expanding role of the nurse practitioner (NP) under the Affordable Care Act could potentially expose the NP to medical malpractice liability
- Describe steps for the NP to implement to avoid potential malpractice issues
- Define what differentiates body art from body mutilation
- Identify types of body modifications and the potential risks associated with each procedure
- Explain the effects of trauma on brain development and behavior
- Report two "trauma-informed care/ consciousness" interventions
- Review how the progression of industry innovations has affected symptom management in type 1 diabetes
- Illustrate the benefits of the artificial pancreas on tight blood glucose control with type 1 diabetes mellitus

Our hospital is located in Hollywood, California. We are conveniently situated near Interstate 5 (exit Los Feliz Boulevard) and Highway 101.

The Metro Rail Red Line provides convenient access to the hospital at the Sunset and Vermont station. For more information, visit Metro.net or call 1-800-COMMUTE (1-800-286-6889).
