# PROGRAM OUTCOMES

**Upon completion of this conference, the learner will be able to:**

- Explain the effectiveness of sublingual allergy medications.
- Compare the latest medication recommendations for pediatric populations to participant's current practice.
- Implement the latest breastfeeding best practices in primary care settings.
- Assess current practice for implementation of the latest evidence-based lead management strategies.
- Critique the care management of children with a diagnosis of asthma to best available evidence and practice guidelines.
- Explain the relationship between current Emergency Department visits and follow-up care to participant's current practice protocols.
- Implement best practices for administration of immunizations in all practice settings
- Describe the current recommendations for use of silver diamine fluoride in pediatric practices.

# AGENDA
