

NATIONAL READINESS DATABASE

Real-Time Visibility, Ready When It Matters.

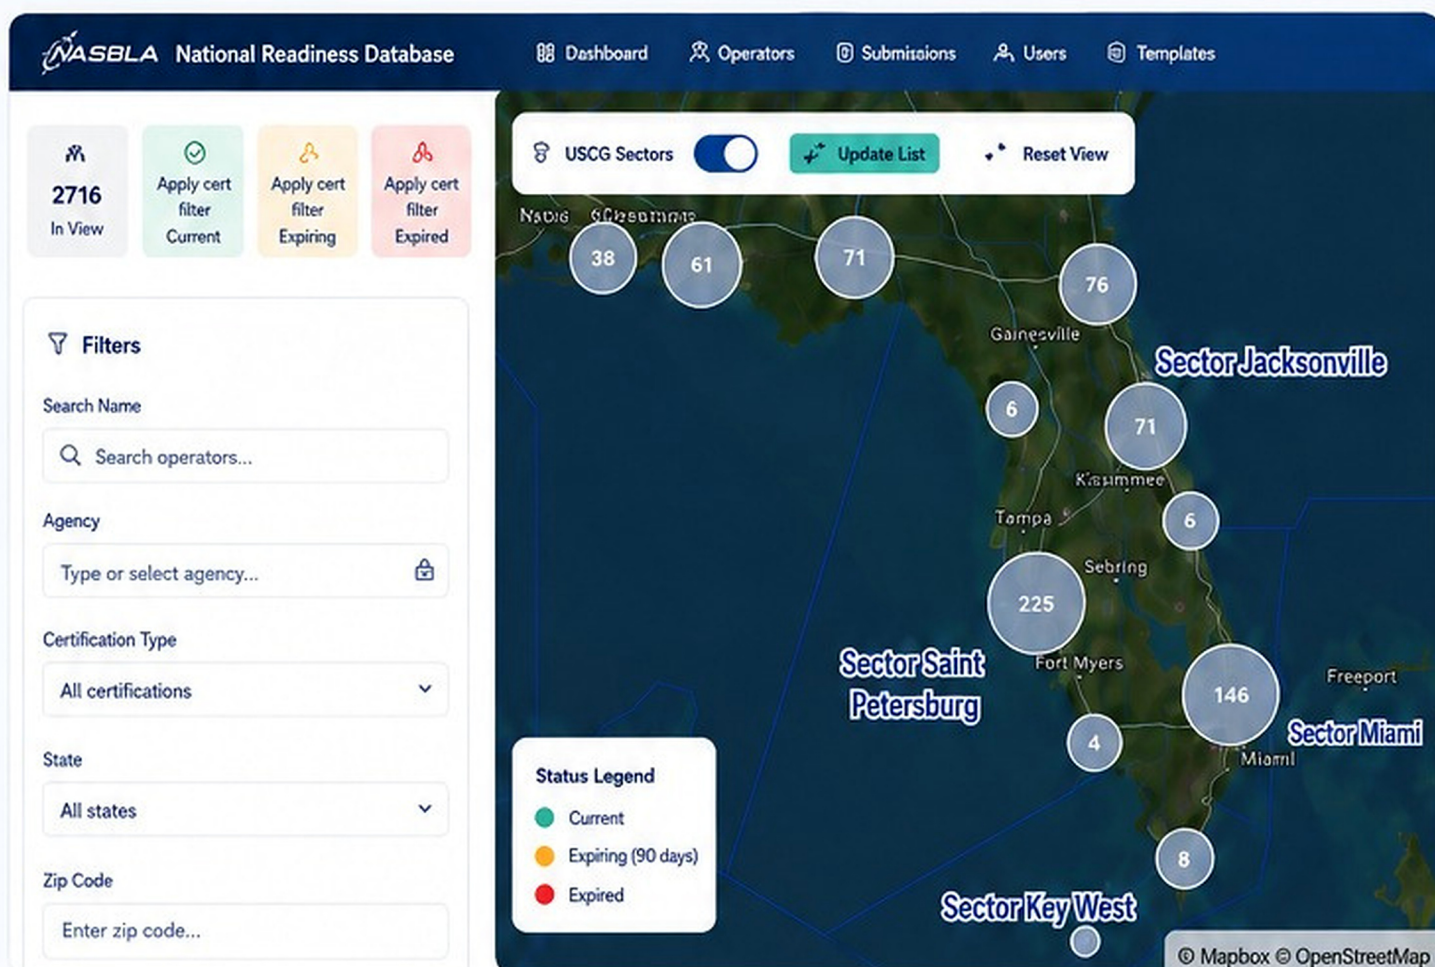

The **National Readiness Database (NRD)** enables the U.S. Coast Guard and Other Government Agencies (OGAs) to identify, track, and deploy trained maritime first responders in real time—strengthening national readiness and response.

1 SEARCH & DISCOVER

Search for trained maritime first responders by:

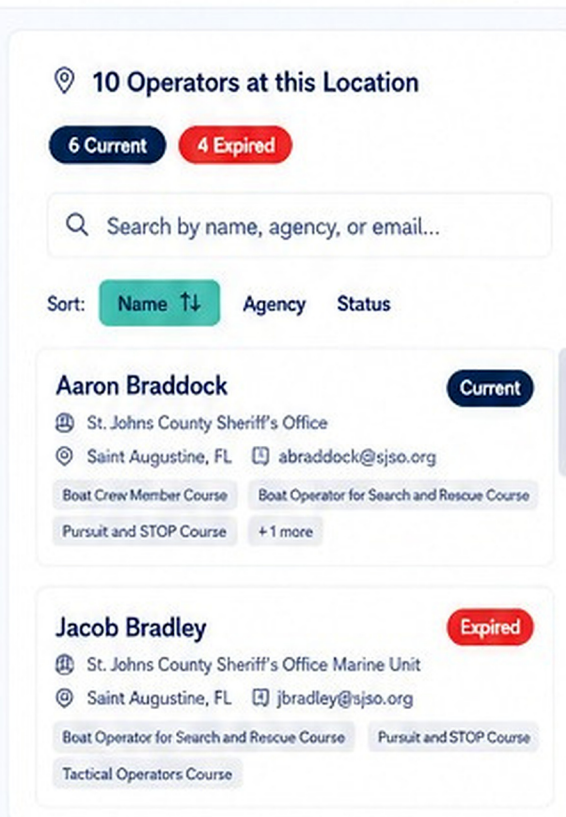

- Sector
- Agency Name
- Personnel Name
- Certification Type
- Currency Status (Current, Approaching Expiration, Expired)

2 VIEW RESULTS

See detailed operator information including:

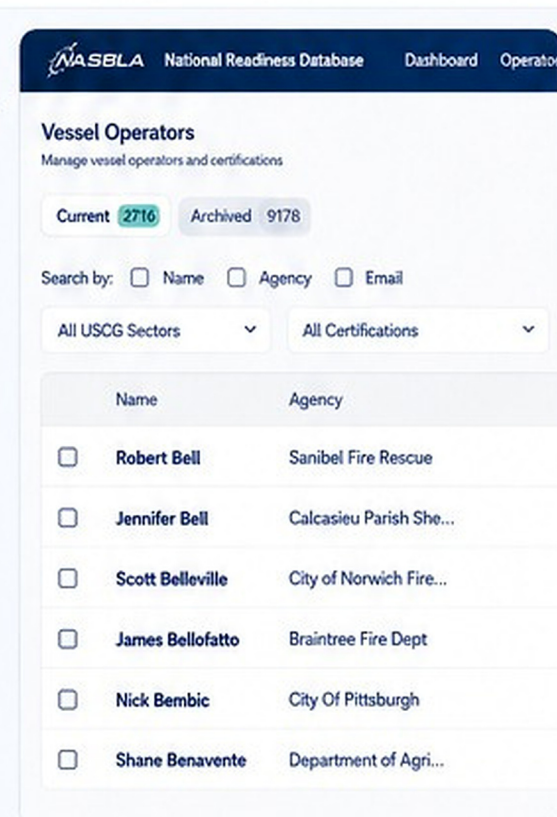

- Agency
- Contact Information
- Certifications
- Certification Status
- Qualification Details

3 MANAGE & UPDATE CURRENCY

Agency training personnel directly update annual currency information.

- Update certifications
- Report annual currency
- Maintain readiness
- Inform CG and OGAs in real time

4 DELIVERING REAL-TIME READINESS

The NRD empowers the U.S. Coast Guard and OGAs to:

- Track trained responders across the nation in real time
- Address increased demand signals and operational tempo needs
- Support unique events and large-scale incidents with confidence
- Strengthen coordination and readiness nationwide

CURRENCY REPORTING DATABASE

A dedicated currency reporting database enables agencies to update annual training and certification currency—ensuring the NRD reflects the most accurate, up-to-date information to meet mission needs.

TRAINED. TRACKED. READY.

BUILDING A STRONGER, MORE CONNECTED MARITIME RESPONSE COMMUNITY.
