

LJA Regulatory Committee

Charges and Responsibilities | 2026 - 2027

The Regulatory Committee is charged with the following responsibilities:

1. **Monitor, analyze, and assess regulatory and standards activities** affecting life jackets and related equipment. Evaluate the implications of existing and proposed regulations on manufacturing, certification, labeling, public use, and public safety.
2. **Serve as a forum for regulatory information sharing and member discussion** on emerging trends, compliance challenges, and evolving regulatory expectations affecting life jacket safety.
3. **Collaborate with staff to develop and issue timely alerts and updates** to inform members of significant standards, regulatory, or compliance issues that impact the Association's membership.
4. **Provide informed recommendations and technical input** to Association leadership to support regulatory positions, public comments, and advocacy priorities aligned with the Association's mission.
