

Maritime first responder association offers free membership to those signing up in 2019

The [Maritime Professional Responders and Officers \(Maritime MPRO\) Association](#) represents the national voice of the maritime first responder, enhancing the safety and security of our nation's waterways. Maritime PRO was established to represent the maritime law enforcement, military, and emergency responder community of professionals and provide them with a home. Maritime PRO provides a national platform that supports the individual federal, state, local, tribal, and private sector maritime public safety professional through advocacy, partnership and professional development.

Through 2019, those who sign up as new members to the association can join at no cost (regularly \$59/year). New members will join the ranks of current members, enjoying the same member benefits as well as access to all of the association resources and its national network of members. To join visit <http://maritimepro.org/join>.

Who can join?

Those who through their employment, voluntary service or retirement related to public safety, are involved in maritime public safety.

What does the Maritime PRO Community provide?

- An opportunity to unite with a national network of maritime professionals who share a common purpose and interest;
- The chance to speak and be heard, with a national voice, addressing common issues and promoting your profession;
- Access to a platform dedicated to enhancing your skills and capabilities;
- The chance to have a direct input on the national positions and actions of the Maritime PRO association.

What are the benefits?

- Maritime PRO online community which allows members to discuss current information, trends, events and resources that are helpful to you as maritime first responders;
- Access to a cadre of maritime professional subject matter experts on issues regarding training, policy, procedures, tactics, funding, leadership, trends, resources, equipment and much more;
- Access to membership virtual meetings, where you can hear about relative subjects that can influence and enhance how you do your job on the water;
- Peer networking educational opportunities through workshops, publications, and online tools;
- Professional development opportunities, both online and in person;
- Online resources regarding new concepts, best practices and training.
